

Correction to “In Vivo-Formed versus Preformed Metabolite Kinetics of *trans*-Resveratrol-3-sulfate and *trans*-Resveratrol-3-glucuronide”

In the article referenced above [Sharan S, Iwuchukwu OF, Canney DJ, Zimmerman CL, and Nagar S (2012) *Drug Metab Dispos* **40**:1993–2001; doi:10.1124/dmd.112.046417], errors were introduced to equations (1)–(3) after the authors corrected the page proofs. “RES” instead of “R3S” or “R3G” was used as a superscript in four places. The corrected equations are:

$$fm_{R3S} = \left[\frac{(AUC_{R3S}^{RES})}{(AUC_{R3S}^{R3S})} \right] \times \left[\frac{Dose_{R3S}}{Dose_{RES}} \right] \times \left[\frac{C1_{R3S}^{RES}}{C1_{R3S}^{R3S}} \right] \quad (1)$$

$$fm_{R3G} = \left[\frac{(AUC_{R3G}^{RES})}{(AUC_{R3G}^{R3G})} \right] \times \left[\frac{Dose_{R3G}}{Dose_{RES}} \right] \times \left[\frac{C1_{R3G}^{RES}}{C1_{R3G}^{R3G}} \right] \quad (2)$$

$$fm_{R3S} = \left[\frac{(AUC_{R3S}^{RES})}{(AUC_{R3S}^{R3S})} \right] \times \left[\frac{Dose_{R3S}}{Dose_{RES}} \right] \quad (3)$$

The PDF and XML versions of this article have been corrected.

The compositor apologizes for any confusion and inconvenience caused by these errors.
