Drug Metabolism and Disposition:
the biological fate of chemicals

January/February 1992

CONTENTS

Catalytic and Immunologic Similarities between Monkey and Human Liver Cytochrome P-450db1 (Human Cytochrome P-450 2D6. S. V. Otton, R. F. Tyndale, D. Wu, T. Inaba, W. Kalow, and E. M. Sellers) ........................................... 1

Pharmacokinetics of 2-Ethyl-1,3-hexanediol II. Non-systemic Disposition following Single Percutaneous or Peroral Doses in Fischer 344 Rats. Stephen W. Franz, Joyce L. Bektitt, Christine M. Grosse, Marilyn J. Tallant, and Bryan Ballantyne ........................................... 6

Comparisons of Hepatic and Renal Cytochromes P-450-Dependent Monoxygenases from Fuzzy and Sprague-Dawley Rats. Elizabeth Cherithun-Dam, Ramona Almirez, and Alivio P. Alvaraes ........................................... 19

Characterization of Human Liver Cytochromes P-450 Involved in Theophylline Metabolism. Mohamadi A. Sarkar, Christine Hunt, Philip S. Guzelian, and H. Thomas Karnes ........................................... 31

Microbial Models of Mammalian Metabolism: Bio-transformations of N-Methylcarbazole Using the Fungus Cunninghamella echinulata. Wei Yang and Patrick J. Davis ........................................... 38

Pharmacokinetic Evaluation of (-)-6-Aminocarbovir as a Prodrug for (-)-Carbovir in Rats. Cheryl L. Zimmerman, Romy P. Remmel, Safaa S. Ibrahim, Scott A. Beers, and Robert Vince ........................................... 47

Deacetylation of Cinobufagin by Rat Liver. Lisha Zhang, Kimiko Aoki, Takemi Yoshida, and Yukio Kurowa ........................................... 52

Characterization of the Cytochrome P-450 Gene Family Responsible for the N-Dekalylination of the Ergot Alkaloid CQA 206-291 in Humans. Simon E. Ball, Gerald Maurer, Markus Zollinger, Margarita Ladona, and Alison E. M. Vickers ........................................... 56

The Urinary Metabolic Profile of Metyrapone in the Rat: Identification of Two Novel Isomeric Metyrapol N-Oxide Metabolites. Joel I. Usansky and Lyaquatali A. Damani ........................................... 64

Disposition of 1-Naphthol in the Channel Catfish (Ictalurus punctatus). Guy R. Stehly and Steven M. Plakas ........................................... 70

Effect of H2-Receptor Antagonists on Rat Liver Cytosolic Acetyl CoA:Arlyamine N-Acetyltransferase Activity. Craig K. Svensson and Mark Tomilo ........................................... 74

Cytochrome P-450 Isozymes Involved in the Oxidative Metabolism of Δ2-Tetrahydrocannabinol by Liver Microsomes of Adult Female Rats. S. Narimatsu, K. Watanebe, T. Matsunaga, I. Yamamoto, S. Imaoka, Y. Funae, and H. Yoshimura ........................................... 79

Felbamate Metabolism in Pediatric and Adult Beagle Dogs. J. T. Yang, M. Morris, K. K. Wong, N. Kucharzyk, and R. D. Sofia ........................................... 84

Metabolism of the Anticoagulant Peptide, MDL 28,050, in Rats. Mary Pat Knadler, Bradley L. Ackermann, John E. Coutant, and Gail H. Hurst ........................................... 89

Identification of Cytochrome P-450IIB1 as a Cocaine-Bioactivating Isoform in Rat Hepatic Microsomes and in Cultured Rat Hepatocytes. Urs A. Boelsterli, Adriana Lanzotti, Christian Goldlin, and Maja Oertle ........................................... 96

Disposition of the Novel Serotonin Agonist, LY228729, in Monkeys and Rats. S. P. Swanson and J. Catlow ........................................... 102

Pharmacokinetics and Tissue Distribution of 2-Fluoro-β-alanine in Rats: Potential Relevance to Toxicity Pattern of 5-Fluorouracil. Ruwen Zhang, Seng-Jaw Soong, Tiepu Liu, Stephen Barnes, and Robert B. Diasio ........................................... 113

Continued on next page
Contents (cont'd.)

Comparative Metabolism and Covalent Binding of Procainamide by Human Leukocytes. Jack Uetrech and Bridget Sokoluk ..................... 120

SHORT COMMUNICATIONS

Metabolism of Enflurane in Dogs. T. Sakai, M. Takao, and H. Yoshida .................... 127

Substrate Specificity and Other Characteristics of a Novel Aldehyde Dehydrogenase Present in Female DBA/2 Mouse Liver. N.-S. Zhao and N. E. Sla- dek ............................................ 134
