Drug Metabolism and Disposition: the biological fate of chemicals

September/October 1992 Vol. 20, No. 5

CONTENTS

Best Paper Award for 1991 ........................................... 619

Induction of CYP1A1 mRNA in Rat Epidermis and Cultured Human Epidermal Keratinocytes by Benz(a)anthracene and β-Naphthoflavone. ISLAM U. KHAN, DAVID R. BICKERS, TARIQ M. HAQQI, AND HASAN MUKHTAR ........................................... 620

Isolation, Purification, and Characterization of Two New Chemical Decomposition Products of Methyloxyprocarbazine. DIANE SHOMIN SWAFFAR, W. GRAYDON HARKER, STEVEN C. POMERantz, HENG-KEANG LIM, AND GAROLD S. YOST ........................................... 632

Effects of Dose, Strain, and Dosing Vehicle on Methacyronitrile Disposition in Rats and Identification of a Novel Exhaled Metabolite. B. I. GHANAYEM, I. M. SANCHEZ, AND L. T. BURKA ........................................... 643

Pharmacokinetics and Renal Handling of Enprofylline in Pregnant Rats. ISAO MURAOKA, TAKAAKI HASEGAWA, MASAYUKI NADAI, KATSUYOSHI KATO, AND TOSHIKATA NABESHIMA ........................................... 653

Species and Tissue Differences in the Microsomal Oxidation of 1,3-Butadiene and the Glutathione Conjugation of Butadiene Monoxide in Mice and Rats: Possible Role in 1,3-Butadiene-Induced Toxicity. JANE E. SHARER, RENEE J. DUESCHER, AND ADNAN A. ELFARRA ........................................... 658

Identification and Comparison of the Urinary Metabolites of [1,2,3-13C3] Acrylic Acid and [1,2,3-13C3] Propionic Acid in the Rat by Homonuclear 13C Nuclear Magnetic Resonance Spectroscopy. STEVEN M. WINTER, GREGORY L. WEBER, PAUL R. GOOLEY, NEIL E. MACKENZIE, AND I. GLENN SIPES ........................................... 665

Pharmacokinetics of Intravenously Injected [1H]Tetrachloro(d,l-trans)1,2-diaminoethylenelhene Platinum (IV) (Tetraplatin) in Mice. YUICHiro KIDO, ABDUL R. KHOKHAR, AND ZAHID H. SIDDIK ........................................... 673

Disposition of Acrivastine in the Male Beagle Dog. MICHAEL J. McNULTY, DONNA L. DEAL, FRED R. NELSON, STEPHEN WELLER, PISAL CHANDRASURIN, JOHN SHOCKCOR, AND JOHN W.A. FINDLAY ........................................... 679

Bromo(mono)hydroxy)phenyl Mercapturic Acids: A New Class of Mercapturic Acids from Bromobenzene-Treated Rats. JIANG ZHENG AND ROBERT P. HANZLIK ........................................... 688

Disposition of Metabolically Labeled Recombinant Soluble CD4 (sT4) in Male Sprague-Dawley Rats Following Intravenous and Subcutaneous Administration. CHARLES B. DAVIS, KATHLEEN E. BOYLE, JAMES J. URBANSKI, ROBERT T. PARADYSZ, AND KEI-LAI L. FONG ........................................... 695

Pharmacokinetics and Pharmacodynamics of Topotecan in Patients with Advanced Cancer. LOUISE B. GROCOW, ERIC K. ROWINSKY, RANDALL JOHN-SON, SUSAN LUDEMAN, SCOTT H. KAUFMANN, FRANCIS L. MCCABE, BRIAN R. SMITH, LISA HUROWITZ, ANNE DELISA, ROSS C. DONEHOWER, AND DENNIS A. NOE ........................................... 706

Exogenous Glutathione Decreases Cellular Cadmium Uptake and Toxicity. Y. JAMES KANG ........................................... 714

Enantioselectivity of Microsomal and Cytosolic Esterases in Rat Intestinal Mucosa. SHEN K. YANG, YIN-YI HSIEH, WEN-CHANG CHANG, AND JINDING HUANG ........................................... 719

Concomitant Induction of Microsomal Epoxide Hydro- lase and UDP-Glucuronosyltransferase Activities by Dipyridine Compounds. MICHAEL R. FRANKLIN AND DAVID E. MOODY ........................................... 726

Comparative Pharmacokinetics of Ceferozar and Cephradine in Untreated Streptozotocin Diabetic Rats. EMI NAKASHIMA, RYO MATSUSHITA, MASAMI TAKEDA, TAKEKI NAKANISHI, AND FUJIO ICHIMURA ........................................... 730

Continued on next page
Contents (cont'd.)

The Pharmacokinetics of 1,2-Diethyl-3-hydroxypyridin-4-one (CP94) in Rats. OLA R. EPEMOLU, SURINDER SINGH, ROBERT C. HIDER, AND LYAQUAT A. DAMANI .......................................................... 736

Metabolism of 7-(1,3-Thiazolidin-2-ylmethyl)theophylline by Rat Liver Microsomes: Evidence for a Monoxygenase-Dependent Step in 1,3-Thiazolidine Ring Cleavage. GIORGIO GROSA, OTTO CAPUTO, MAURIZIO CERUTI, AND GIUSEPPE BIGLINO 742

Pharmacokinetics in Mice of the Anti-Retrovirus Agent 9-(2-Phosphonylmethoxyethyl)adenine. LIEVE NAESSENS, JAN BALZARINI, AND ERIK DE CLERCQ 747

Cytochrome P-450 3A Enzymes are Responsible for Biotransformation of FK506 and Rapamycin in Man and the Rat. MARTIN SATTLER, F. PETER GUENGERICH, CHUL-HO YUN, UWE CHRISTIANS, AND KARL-FR. SEWING ....................... 753

Isolation and Structural Characterization by Spectroscopic Methods of Two Glucuronide Metabolites of Mexiletine after N-Oxidation and Deamination. JACQUES TURGEON, J. R. JOCelyn PARÉ, MARCEL LALANDE, ODETTE GRECH-BELANGER, AND PIERRE M. BÉLANGER ........................................ 762

SHORT COMMUNICATIONS

Cytochrome P-450-Mediated N-Dechloroethylation of Cyclophosphamide and Ifosfamide in the Rat. JAN A. RUZICKA AND PETER C. RUENITZ ................. 770

Trimethadione Metabolism as an Index of Hepatic Drug-Oxidizing Capacity in Dogs with Liver Ischemia. EINOSUKE TANAKA, MASAaki OHTSUkA, KENJI YUZAWA, AKIO ISIKAWA, KATAshi FUKAO, AND YOUJi IWASAKI .............................................. 773

Inhibition of Rabbit Microsomal Cytochrome P-450 2E1-Dependent p-Nitrophenol Hydroxylation by Substituted Benzene Derivatives. DENNIS R. KOOP AND CARMEN L. LAETHEM .......................... 775
