

Drug Metabolism and Disposition:

the biological fate of chemicals

Editor
VINCENT G. ZANNONI

A publication of the
American Society for
Pharmacology and
Experimental Therapeutics

Vol. 20, No. 5
September/October 1992

Founded in 1973
by Kenneth C. Leibman

Published by
Williams & Wilkins

In this Issue:

Best Paper Award for 1991
Epidermal CYP1A1 Gene Expression
Conjugation of DNFB to Plasma Proteins in
the Rat
Chemical Decomposition of
Methylazoxypcarbazine
Methacrylonitrile Disposition in Rats
Enprofylline Disposition During Pregnancy
Species/Tissue Differences in Butadiene
Metabolism
Urinary Metabolites of Acrylic Acid
Pharmacokinetics of [³H]Tetraplatin
in Mice
Acrivastine Disposition in the Dog
Bromo(monohydroxy)phenyl Mercapturic
Acids
Disposition of [³H]sT4 in Rats

Topotecan Pharmacokinetics and
Pharmacodynamics
Exogenous GSH and Cadmium Toxicity
Enantioselectivity of Esterases
Epoxide Hydrolase Parallels
Glucuronosyltransferase
Diabetes Alters Disposition of
Cephalosporins
Pharmacokinetics of CP94 in Rats
Metabolism of 7TT by Rat Liver Microsomes
Pharmacokinetics of PMEA
P-450 3A4 in FK506 and Rapamycin
Metabolism
Glucuronides of Mexiletine Metabolites
Oxazaphosphorine *N*-Dechloroethylation
Trimethadione Metabolism in Dogs
Inhibition of Cytochrome P-450 2E1
