

Drug Metabolism and Disposition:

the biological fate of chemicals

Editor
VINCENT G. ZANNONI

A publication of the
American Society for
Pharmacology and
Experimental Therapeutics

Vol. 20, No. 6
November/December 1992

Founded in 1973
by Kenneth C. Leibman

Published by
Williams & Wilkins

In this Issue:

Review: Peroxisome Proliferators
Induction of P-450 by Imidazole in Neonates
Induction of P-450IIB, IIC, and IIIA mRNAs in Mice
Cyclosporin A Metabolism in Organ Slice Cultures
Pharmacokinetics of Valproate Analogs
Metabolism of 3-BHA by HRP and H₂O₂
Modeling Enalkiren Effects
Ontogenesis of *in Vitro* Theophylline Kinetics
Stereoselectivity of Human FMO
Sulfoxidation
Characterization of Xylazine Metabolites
Gemcitabine Metabolism and Disposition
Pharmacokinetics of Oral Methamphetamine
Pharmacokinetic Analysis of Cocaine Metabolism
Metabolism of L-696,229 in Rat and Liver Slices
Sulfoxidation by Rat Liver Cytochromes P-450

N-Dealkylation of Furosemide by *C. elegans*
Oxidative Metabolism of Cinchona Antimalarials
Tertiary Amine UDP-Glucuronosyltransferases
Microsomal Azoreduction: Structural Considerations
Pharmacokinetics of Usnic Acid
Oxidation of Carbovir by Rat Liver Cytosol
Triprolidine Disposition in Mice
Triprolidine Disposition in Dogs
Oral UFT Pharmacology
Investigation of Conjugated Metabolites of 4OH \bar{a}
Metabolism of Aldose Reductase Inhibitors
Disposition of Ro5-3325
Sulofenur Indene Metabolites
Covalent Binding of Etodolac to Albumin *in Vitro*
Elimination and Organ Retention of Argemone
