Leading Pharmacology Journals

Publications of the American Society for Pharmacology and Experimental Therapeutics, Inc.

The Journal of Pharmacology and Experimental Therapeutics
Editor: John A. Harvey, Ph.D.

JPET is respected world over as one of the leading research journals in the field of pharmacology. You'll find broad coverage of all aspects of the interactions of chemicals with biological systems, including autonomic, behavioral, cardiovascular, cellular, clinical, developmental, gastrointestinal, immuno-, neuro-, pulmonary, and renal pharmacology, as well as analgesics, drug abuse, metabolism and disposition, chemotherapy, and toxicology. **Monthly.**

Drug Metabolism and Disposition: The Biological Fate of Chemicals
Editor: Raymond F. Novak, Ph.D.

**Drug Metabolism and Disposition** publishes experimental results from *in vitro* and *in vivo* systems that bring you significant and original information on metabolism and disposition of endogenous and exogenous compounds, including pharmacologic agents and environmental chemicals. The areas covered are: xenobiotic metabolism, expression of drug metabolizing enzymes, regulation of drug metabolizing enzyme gene expression, pharmacokinetics, pharmacodynamics and toxicological consequences of xenobiotic metabolism. **Monthly.**

Pharmacological Reviews
Editor: David B. Bylund, Ph.D.

**Pharmacological Reviews** is a showcase for important review articles in your field, featuring longer papers on topics of high current interest. The areas covered in review papers have included biochemical and cellular pharmacology, drug metabolism and disposition, renal pharmacology, neuropharmacology, behavioral pharmacology, clinical pharmacology, and toxicology. No library should be without a subscription. **Quarterly.**

---

**Molecular Pharmacology**
Editor: Raymond Dingledine, Ph.D.
The papers published in **Molecular Pharmacology** are on the cutting edge of research on drug action and selective toxicity at the molecular level. Original applications of biochemistry, biophysics, genetics, and molecular biology are juxtaposed with innovative pharmacologic research to elucidate basic problems in pharmacology and toxicology, including such areas as molecular mechanisms involved in drug receptor-effector coupling, xenobiotic metabolism, and antibiotic and anticancer drug action. **Monthly.**

Outside North America, fax 1-410-361-8048 or call one of our international offices: Tokyo (03) 369-5400, London 0171-585-2577, Hong Kong 852-2610-2539.
DRUG METABOLIZING ENZYMES

From PanVera Corporation

✓ Recombinant Human Proteins
✓ Highly Purified ✓ Enzymatically Active

Phase I Drug Metabolizing Enzymes
Cytochrome P450s: 3A4, 1A1, 1A2, 2D6, 2E1,
NADPH-P450 Oxidoreductase
Cytochrome b5

Phase II Drug Metabolizing Enzymes
Glutathione Transferases (GSTs) A1-1, P1-1, M1-1
Sulfotransferases
N-Acetyltransferases
