CONTENTS

ARTICLES

Kinetics of Acetyl Coenzyme A: Arylamine N-Acetyltransferase from Rapid and Slow Acetylator Frog Tissues. CHIN C. Ho, TSAM H. LIN, YIU S. LAI, JING G. CHUNG, GERALD N. LEVY, AND WENDELL W. WEBER ......................................................... 137

Inhibition of the Intestinal Digoxin Absorption and Exsorption by Quinidine. SHENG-FANG Su AND JIR-DU G. HUANG ......................................................... 142

Tissue Distribution and Pharmacokinetics of Centchroman: A New Nonsteroidal Postcoital Contraceptive Agent and Its 7-Desmethyl Metabolite in Female Rats after a Single Oral Dose. J. K. PALIWAL AND R. C. GUPTA ......................................................... 148

Absorption, Distribution, Metabolism, and Excretion of N,N-Diethyl-M-Toluamide in the Rat. GERALD P. SCHOENG, RALPH E. HARTNAGEL, JR., THOMAS G. OSIMIRZ, AND SARI LLANSO ......................................................... 156

Metabolic Interactions of Putative Cytochrome P4503A Substrates with Alternative Pathways of Dapsone Metabolism in Human Liver Microsomes. YACOUB IRSHAID, ROBERT A. BRANCH, AND ADEDAYO ADEDOYIN ......................................................... 164

Hydroxylation of Lauramide Diethanolamine by Liver Microsomes. JAMES MERDINK, KRISTI DECOSTA, JAMES M. MATHIEWS, CARLTON B. JONES, JANICE RICE OKITA, AND RICHARD T. OKITA ......................................................... 180

In Vitro and In Vivo Biotransformation of 6,7-Dimethyl-2,4-di-1-pyrrolidinyl-7H-pyrrolo[2,3-d]pyrimidine (U-89843) in the Rat. ZHYANG ZHAO, KENNETH A. KOELINGER, GORDON L. BUNDY, LEE S. BANIT, GUY E. PADBURY, MICHAEL J. HAUER, AND PHILLIP E. SANDERS ......................................................... 187

Involvement of Mammalian Liver Cytosols and Aldehyde Oxidase in Reductive Metabolism of Zonisamide. KAZUMI SUGIHARA, SHIGEYUKI KITAMURA, AND KIYOSHI TATSUMI ......................................................... 199

Modeling the Cytochrome P450-Mediated Metabolism of Chlorinated Volatile Organic Compounds. CHRIS L. WALLER, MARINA V. EVANS, AND JAMES D. MCKINNEY ......................................................... 203

Comparison of Ketoconazole and Fluconazole as Cytochrome P450 Inhibitors: Use of Steady-State Infusion Approach to Achieve Plasma Concentration-Response Relationships. CHRISTOPHER M. ERVINE, DIANE E. MATTHEW, BEVERLEY BRENNAN, AND J. BRIAN HOUSTON ......................................................... 211

Local Absorption Kinetics into the Portal System Using the Portal-Venous Concentration Difference after an Oral Dose of Diclofenac in the Awakening Rat: Accelerative Effect of Bile on Intestinal Absorption of Diclofenac. KENI TABATA, KIYOSHI YAMAOKA, TAKAKO FUKUYAMA, AND TERUMICHI NAKAGAWA ......................................................... 216

Continued on next page
Contents (cont'd.)

Biotransformation of Lifibrol (U-83860) to Mixed Glyceride Metabolites by Rat and Human Hepatocytes in Primary Culture. E. L. Sun, K. L. Feenstra, F. P. Bell, P. E. Sanders, J. G. Slater, and R. G. Ulrich ............... 221

Effect of 3-Methylcholanthrene on Bunitrolol Metabolism: Kinetics and Immunological Studies on 4-Hydroxylation of Bunitrolol Catalyzed by Two Species of Cytochromes P450 in Rat Liver Microsomes. Shoichi Fujita, Makihiko Masuda, Yoshinori Shimamoto, Hidenobu Hoshi, Satoru Kariya, Aki Kazusa, and Tokui Suzuki .... 254

SHORT COMMUNICATIONS

Pharmacokinetics and Biodistribution of 131I-Labeled Trigalactose Conjugate of Streptavidin. Mazzaz Hashmi and Scott F. Rosebrough ............. 267

Influence of Probenecid on the Renal Excretion Mechanisms of Cefadroxil. María José Gimeno, Mauricio Martínez, Luis Granero, Francisca Torres-Molina, and José-Esteban Peris ....... 270
