ASPET

AMERICAN SOCIETY FOR PHARMACOLOGY
AND EXPERIMENTAL THERAPEUTICS

Addex Pharmaceuticals is a rapidly growing Swiss-based pharmaceutical company engaged in the discovery and development of novel therapeutic compounds for the treatment of unmet medical needs. To further expand its team, Addex is seeking to recruit a:

Director of Drug Metabolism and Pharmacokinetics

We are looking for a motivated individual to lead the drug metabolism and pharmacokinetics group, supporting the discovery and development of novel small molecules which act as allosteric modulators for GPCRs. In this position you will design, perform, analyse and interpret drug metabolism (DM), pharmacokinetic (PK), and pharmacodynamic (PD) studies.

You will manage a small group of scientists and you will provide expertise and leadership in the DMPK area to several multidisciplinary project teams; you will represent the company in international conferences as well as in external collaborations; excellent oral and written communication skills are necessary to cover this key role in the company.

Requirements: Ph.D. in Pharmacokinetics, Pharmaceutical Sciences, or related scientific discipline. 5-7 years post-graduate experience in the pharmaceutical industry in related fields such as Pharmacokinetics, Drug Metabolism or Clinical Pharmacology with a proven track record in Drug Discovery; experience with in vitro drug metabolism studies and IVIVC evaluation is mandatory as well as extensive experience in designing, interpreting and reporting DM/PK/PD studies. Ability to run LC-MS/MS equipments would be a plus. For further details, please visit our web site www.addexpharma.com. If you are interested send your CV to:

Take a Dip In Our Pool

LiverPool™ 5- and 10- Donor Pooled Cryopreserved Human Hepatocytes

In Vitro Technologies, the originator of cryopreserved hepatocytes, now offers LiverPool™ (patent pending) 5- and 10- Donor Pooled Cryopreserved Human Hepatocytes for use in toxicity, apoptosis, and metabolism studies.

- ◆ **Ease of use.** Available in 5- and 10-donor pooled lots.
- ◆ **Convenience.** Increase your available research time by eliminating the need to pool individual vials.
- ◆ **Cost savings.** Decrease the number of vials purchased.
- ◆ **Ready to use.** Pooled lots fully characterized and available for immediate delivery.
- ◆ **Convenient packaging.** Vial contains 5 million viable cells.
