

Why Publish with ASPET?

Because ASPET gives you these advantages:

- ◆ **Low Page Charges** — \$35/page for ASPET members, \$70/page for nonmembers (publishing one paper can save the \$125 membership dues)
- ◆ **Low Color Fees** — \$200/color figure for ASPET members, \$400/color figure for nonmembers
- ◆ **Online Manuscript Submission** — submit your manuscript 24/7 — whenever it suits your schedule; online peer review reduces review times; track the progress of your manuscript through the review process
- ◆ **Publish Online Ahead of Print** — manuscripts are published online shortly after acceptance — at least two months prior to print publication
- ◆ **Wide Dissemination** — accepted manuscripts are freely accessible *immediately*, fully formatted articles are freely accessible 12 months after publication; low-cost pay-per-view option for nonsubscribers; abstracts and tables of contents always freely accessible

Visit www.aspetjournals.org to access each ASPET journal.

ASPET Journals — Widely Read, Highly Respected

Access Drug Metabolism and Disposition beginning with volume 1, issue 1

Drug Metabolism and Disposition starting with volume 1, issue 1 is now online. All pre-1997 articles are available as PDF files. Article titles, authors, and abstracts are fully searchable.

Access to the DMD back issues is included with subscriptions. Nonsubscribers may access these issues using our pay-per-view system. If your institution has a print subscription to DMD, you should have online access as well. Ask your librarian to contact ASPET at info@aspet.org. We'll help establish access.

ASPET membership includes online access to all five ASPET journals. We'll gladly help you activate your subscription if you haven't done so yet. Benefit from the full DMD archive today!

ASPET continues to make articles from 1997 onward freely available 12 months after publication, and Fast Forward articles are freely accessible upon publication.

BD Gentest™ Solubility Scanner Trio

Aggregation, Solubility, and Particle HTS Screening

Aggregation Detective.

Are your compounds aggregating causing false positives?

Find out in < 8 seconds per well.

Characterize compounds that form aggregates and remove them from your costly downstream assays. Also, rapidly verify compound solubility in your assay conditions. With the BD Gentest™ Solubility Scanner Trio on the scene you're sure to getall the facts.

- Quickly detect aggregates at low μm concentrations
- Capture detailed particle profiles for each sample
- Get useful data from complex solutions via single particle characterization
- Wide particle dynamic range (100 nm to 100 μm)
- Minimal compound volume required (25 μl /injection)
- Automatable with 96- and 384-well plates
- Compatible with DMSO stocks, serum or excipients

Helping all people
live healthy lives
