CORRECTION TO "GLUTATHIONE S-TRANSFERASE OMEGA 1 AND OMEGA 2 PHARMACOGENOMICS"

In Table 1 of the article referenced above [Mukherjee B, Salavaggione OE, Pelleymounter LL, Moon I, Eckloff BW, Schaid DJ, Wieben ED, and Weinshilboum RM (2006) *Drug Metab Dispos* **34:**1237–1246], several reported values are incorrect. The "Sequence Change" value for GSTO2 5′-FR -1785 is listed as $T \rightarrow G$ but should be $T \rightarrow C$ instead. For GSTO2 IVS 1 -1131 C \rightarrow T, the frequency for African Americans is listed as 0.417 but should be 0.042. Finally, for GSTO2 Exon 5 389 G \rightarrow A, the frequency for African Americans is listed as 0.008 but should be 0.

The authors regret these errors and apologize for any confusion or inconvenience they may have caused.
