

Correction to: “A Novel Loading Method for Doxycycline Liposomes for Intracellular Drug Delivery: Characterization of In Vitro and In Vivo Release Kinetics and Efficacy in a J774A.1 Cell Line Model of *Mycobacterium smegmatis* Infection”

In Figure 3 of the above article [Franklin RK, Marcus SA, Talaat AM, KuKanich BK, Sullivan R, Krugner-Higby LA, and Heath TD (2015) *Drug Metab Dispos* **43**:1236–1245], recalculation of the scale bar, based on subsequent calibrated images, indicates that the original scale bar calibrations should have been reported as approximately two fold greater. This scaling error had no impact on the data or conclusions of the paper. The authors apologize for any inconvenience this may have caused.
