ANNOUNCEMENT

Announcement. Mary Vore .......................... 1101

PERSPECTIVE

ARTICLES

An Investigation into the Prediction of in Vivo Clearance for a Range of Flavin-containing Mono-oxygenase Substrates. Barry C. Jones, Abhishek Srivastava, Nicola Coleclough, Joanne Wilson, Venkatesh Pillai Reddy, Sara Amberstsson, and Danxi Li .......................... 1060

Involvement of Nuclear Factor κB, not Pregnane X Receptor, in Inflammation-Mediated Regulation of Hepatic Transporters. Walaa A. Abualsunun and Micheline Piquette-Miller ....................... 1077

Hepatocyte-Specific Deletion of EGFR in Mice Reduces Hepatic Abcg2 Transport Activity Measured by \(^{[11C]}\)Lorlatinib and Positron Emission Tomography. Alexander Trad, Karin Komposch, Elisabeth Glitzner, Thomas Wanek, Severin Mairinger, Oliver Langer, and Maria Sibilia .................................................. 1093

ERRATUM

Correction to “Identification of genetic polymorphisms of CYP2W1 in the three main Chinese ethnicities: Han, Tibetan, and Uighur”. .................... 1113

Supplemental material is available online at http://dmd.aspetjournals.org.

About the cover: Representative co-registered coronal whole-body \(^{[11C]}\)lorlatinib PET summation (0–90 minutes) and MR (T1-weighted gradient echo sequence) images of an EGFR\(^{\text{WT}}\) (left) and an EGFR\(^{\text{Δhep}}\) mouse. See the article by Langer et al., (dx.doi.org/10.1124/dmd.117.077081).
