## Supplemental Figure 1

Relationship between CYP1A2 Localization and Lipid Microdomain Formation as a Function of Lipid Composition

**Supplemental Figure 1. Laurdan emission spectra as a function of temperature in model systems**. Laurdan emission scans (400 nm- 620 nm) were monitored at 350 nm excitation as a function of temperature. The effect of temperature increase on the Laurdan emission spectra is illustrated for Model system 1 (A), Model system 2 (B), and Model system 4 (C). Emission scans are representative of 4 independent experiments.
