

Editorial Acknowledgment

Essential to the success of any journal that attempts to maintain a high scholarly level of reporting of scientific research is the quality of the evaluation accorded to the submitted manuscripts. The editor is utterly dependent upon those who review these manuscripts, and all his efforts would come to naught without the devoted and conscientious service given by the reviewers. This editor will always be grateful for the willing and excellent way in which reviewers have accepted and discharged these very time-

consuming duties. A large share of the total chore is accomplished by the members of the Editorial Advisory Board, but much welcome help has come from many other members of the scientific community. The editor acknowledges with many thanks the contributions of the following scientists, each of whom has reviewed one or more manuscripts for *DRUG METABOLISM AND DISPOSITION: the biological fate of chemicals* during the period 1980-1982.
