

# Drug Metabolism and Disposition:

## the biological fate of chemicals

Jan./Feb. 1983

VOL. 11, NO. 1

ISSN 0090-9556

Editor  
**VINCENT G. ZANNONI**

A publication of the  
**American Society for  
Pharmacology and  
Experimental Therapeutics**

Founded by  
**Kenneth C. Leibman, 1973**

**In this issue:**

Brodie Award Lecture  
Pharmacokinetics of 6-mercaptopurine  
Hematin-activated human placental mono-  
oxygenase  
N-demethylation of N-methyl-2-phenethyl-  
amines  
Phenytoin metabolism in mice  
Pulmonary phospholipidosis and drug dis-  
position  
Metabolism of O-ethyl-O-4-nitrophenyl phenyl-  
phosphonothioate in cats  
Alteration of UDPGA concentrations in rat liver  
Murine disposition and pharmacokinetics of Di-  
aziquone  
Phencyclidine metabolism *in vitro*  
Metabolic disposition of (+)-5-methyl-10,11-di-  
hydro-5H-dibenzo [a,d] cyclohepten-5,10-im-  
ine  
Phthalate urinary metabolites  
Physiological model of extrahepatic metabolism  
Microsomal mono-oxygenases' inhibition by  
cadmium or zinc  
Flurazepam: a new metabolite  
Pulmonary absorption of quaternary amines  
Pulmonary absorption of a foreign amino acid
