Drug Metabolism and Disposition: the biological fate of chemicals

May/June 1991

CONTENTS

Evidence for the Involvement of Several Cytochromes P-450 in the First Steps of Caffeine Metabolism by Human Liver Microsomes. François Berthou, Jean-Pierre Flinois, Damrong Ratnasavanh, Philippe Beaulne, Christian Riche, and André Guillouzo ............................. 561

Enzymatic Detoxification of Phosphoramide Mustard by Soluble Fractions from Rat Organ Tissues. Phillip S. Hong and Kenneth K. Chan ............ 568

The Disposition and Pharmacokinetics of Alpidem, a New Anxiolytic, in the Rat. D. Garrigou-Gadenne, A. Durand, J. P. Thenot, and P. L. MorSELLI ...................... 574

1,1-Dichloroethylene Elicits Dose-Dependent Alterations in Covalent Binding and Gluthathione in Mucine Liver. P. Gek Forkert and Madeleine Moussa .................................................... 580

Biotransformation of Territrem by S9 Fraction from Rat Liver. Kuo Huang Ling, Chi Ming Chou, and Yun Long Tseng ........................................... 587

Geometric Isomerization of Doxepin during its N-Demethylation in Humans. Hany Ghbrial, Chandra Prakash, Ulrich G. Tacke, Ian A. Blair, and Grant R. Wilkinson ...................... 596

The Disposition and Metabolism of [14C]Pitrtrixem in Rats after Intravenous and Oral Administration. Joseph L. Woolley, Diane V. DeAngelis, Ronald C. Crouch, John P. Shockcor, and Carl W. Sigel ........................................... 600

Enantioselective Hydrolysis of Lorazepam 3-Acetate by Esterases in Human and Rat Liver Microsomes and Rat Brain S9 Fraction. Kan Liu, F. Peter Guengerich, and Shen K. Yang ............................. 609

The Pharmacokinetics of Dobutamine in Pediatric Intensive Care Unit Patients. Philip H. Schwartz, Maher K. Eldadah, and Christopher J. L. Newth ........................................... 614

Nordihydroguaiaretic Acid, an Inhibitor of Lipoxygenase, also Inhibits Cytochrome P-450-Mediated Monoxygenase Activity in Rat Epidermal and Hepatic Microsomes. Rajesh Agarwal, Zhi Y. Wang, Daniel P. BiK, and Hasan Mukhtar ........................................... 620

A Quaternary Ammonium Glucuronide is the Major Metabolite of Lamotrigine in Guinea Pigs: In Vitro and In Vivo Studies. Rory P. Remmel and Michael W. Sinz ........................................... 630

Stereoselective Metabolism of Prazepam and Halazepam by Human Liver Microsomes. Xiang-Lin Lu, F. Peter Guengerich, and Shen K. Yang ............................. 637

Clinical Pharmacology of 1-β-D-Arabinofuranosyl-5-azacytosine (Fazarabine) following 72-Hour Infusion. Dah H. Ho, Nita Brown, Juan R. Lin, Wendy Covington, Robert A. Newman, Martin Raber, Robert Amato, Sue Schmidt, and Irwin H. Krakoff ........................................... 643

The N-Acytelylation of Sulfamethazine and p-Aminobenzoic Acid by Human Liver Slices in Dynamic Organ Culture. L. Gunawardhana, J. Barr, A. J. Weir, K. Brendel, and I. G. Sipes ........................................... 648

Physiological Pharmacokinetic and Pharmacodynamic Model of Physostigmine in the Rat. Satu M. Somani, Samir K. Gupta, Abdul Khaliique, and Latha K. Unni ........................................... 655

Metabolism and Pharmacokinetics of 1,3-Dinitrobenzene in the Rat and the Hamster. Steven F. McEuen and Marion G. Miller ........................................... 661

Disposition Kinetics and Metabolism of Nicotine-1'-N-Oxide in Rabbits. Min Jiang Duan, Lisa Yu, Chin Savanapridi, Peyton Jacob, III, and Neal L. Benowitz ........................................... 666

Low Dose Chlordecone Pretreatment Altered Cholesterol Disposition without Induction of Cytochrome P-450. Hillary M. Carpenter and Lawrence R. Curtis ........................................... 673

Mechanisms Responsible for the Thermal Sensitivity of Adrenal Microsomal Monoxygenases. Howard D. Colby, Peggy B. Johnson, and Marlene R. Pope ........................................... 679

Continued on next page
Contents (cont’d)

Metabolism of the Acyl-Coa:Cholesterol Acyltransferase Inhibitor 2,2-Dimethyl-N-(2,4,6-trimethoxyphenyl)dodecanamide in Rat and Monkey: ω/β-Oxidation Pathway. Thomas F. Woolf, Susan M. Bjorge, Ann E. Black, Ann Holmes, and Tsun Chang .................................................. 696

Intestinal Absorption of S-(Pentachlorobutadienyl)glutathione and S-(Pentachlorobutadienyl)-L-cysteine, the Glutathione and Cysteine S-Conjugates of Hexachlorobuta-1,3-Diene. Y. Gietl, S. Vamvakas, and M. W. Anders .................................................. 703

Comparative Study of Phase II Biotransformation in Rabbit Ocular Tissues. John B. Watkins, III, Darren P. Wirthwein, and Ruth A. Sanders .................................................. 708

SHORT COMMUNICATIONS

In Vitro Metabolism of the Equatorial C11-Methyl Isomer of Hexahydrocannabinol in Several Mammalian Species. D. J. Harvey and N. K. Brown .................................................. 714

Steroselective Disposition of Ketoprofen in Rats. Seigo Iwakawa, Xiwen He, Sumiko Hashimoto, Christine Volland, Leslie Z. Benet, and Emil T. Lin .................................................. 717

Chronic Administration of Phencyclidine: Pharmacokinetic Comparison of Intravenous and Subcutaneous Infusions in Sprague-Dawley Rats. William D. Wessinger and S. Michael Owens .................................................. 719
