Drug Metabolism and Disposition: the biological fate of chemicals

March/April 1994

Vol. 22, No. 2

CONTENTS

Disposition of the Angiotensin II Receptor Antagonist Use of Rat and Human in Vitro Systems to Assess the Effectiveness and Enzymology of Deoxyguanine Metabolism of 3-[2-(Benzoxazol-2-yl)ethyl]-5-ethyl-6-methylpyridin-2(1H}-one (L-696,229), an HIV-1 Reverse Transcriptase Inhibitor, by Rat Liver Slices and in Humans. SURESH K. BALANI, LAURA R. KAUFFMAN, BYRON H. ARISON, TIMOTHY V. OLAH, MARK E. GOLDMAN, SANDOR L. VARGA, JULIE A. O'BRIEN, HARRI G. RAMJIT, CLARENCE S. ROONEY, JACOB M. HOFFMAN, AND STEVEN M. PITZENBERGER

Solvolytic Formation of 1,2-Dichloro-3,4-epoxybutane from Butadiene Monoxide under Physiological Conditions. XIAOQIN CHENG, CHRISTOPHE MANGLIER-POULET, DAVID ROSS, AND JAMES A. RUTH

Dispositional Characteristics of a Tyrosine Kinase Inhibitor (RG 14620) in Rats and Rabbits following Intravenous Administration or Dermal Application. VINOD K. KHETARPAL, PETER M. MARKHAM, AND JOHN A. ZIEMNIK

Bile Flow but Not Enterohepatic Recirculation Influences the Pharmacokinetics of Ranitidine in the Rat. A. BENJAMIN SUTTLE AND KIM L. R. BROUWER

The Pharmacokinetics of 1,3-di(4-Imidazolino-2-methoxyphenox) propane-Lactate (DMP-Lactate), A New Agent against Opportunistic Infections, in Male Beagle Dogs. IHIOR BEKERSKY, R. JAMES PUHL, GLEN HANSON, AND SEYMOUR MONG

Metabolic Kinetics of Pseudoracemic Propranolol in Human Liver Microsomes: Enantioselectivity and Quinidine Inhibition. PUNIT H. MARATHE, DANNY D. SHEN, AND WENDEL L. NELSON

Induction and Regulation of CYP2E1 in Murine Liver after Acute and Chronic Acetone Administration. P. GEK FORKERT, ZAHREIN M. REDZA, STEVE MANGOS, SANG S. PARK, AND SHUI-PANG TAM

The Polymorphic Cytochrome P-4502D6 Is Involved in the Metabolism of Both 5-Hydroxytryptamine Antagonists, Tropisetron and Ondansetron. V. FISCHER, A. VICKERS, F. HEITZ, S. MAHADEVAN, J.-P. BALDECK, P. MINERY, AND R. TYNES

Pharmacokinetic Study of p-Chloronitrobenzene in Rat. TOSHIYUKI YOSHIDA

In Vitro Metabolism of L-696,229, an HIV-1 Reverse Transcriptase Inhibitor in Rats and Humans: Hepatic and Extrahepatic Metabolism and Identification of Enzymes Involved in the Hepatic Metabolism. THOMAYANT PRUEKSARITANONT, LYNN M. JENSEN, S. M. GREIER-POULET, DAVID S. MANGOS, SANG S. PARK, AND HARRI G. RAMJIT
