Drug Metabolism and Disposition: the biological fate of chemicals

July 1996

CONTENTS

ACCELERATED COMMUNICATION
Replacing 14C with Stable Isotopes in Drug Metabolism Studies. Fred P. Abramson, Yomannes Tiffera, Josef Kusmierz, Rick C. Steenwyk, and Paul G. Pearson ................. 697

ARTICLES
Lauramide Diethanolamine Absorption, Metabolism, and Disposition in Rats and Mice after Oral, Intravenous, and Dermal Administration. James M. Mathews, Kristi deCosta, and Brian F. Thomas ............................................ 702

First-Pass Metabolism of Lidocaine in the Anesthetized Rabbit: Contribution of the Small Intestine. Khinh-Tuoc Le, Helene Maurice, and Patrick du Souich ...................................................... 711

Pathways of Metabolism of [1-14C]-Trans-Anethole in the Rat and Mouse. Stephen V. J. BOUNDS AND John Caldwell .................................................. 717

Effects of Hydrazine, Phenelzine, and Hydralazine Treatment on Rat Hepatic and Renal Drug-Metabolizing Enzyme Expression. Melissa Runge-Morris, Yi Feng, Richard C. Zangar, and Raymond F. Novak .................................................. 734

Pharmacokinetics of Cidofovir in Monkeys: Evidence for a Prolonged Elimination Phase Representing Phosphorylated Drug. Kenneth C. Cundy, Zhen-Hong Li, Michael J. M. Hitchcock, and William A. Lee .................. 738

Pharmacokinetics, Bioavailability, Metabolism, and Tissue Distribution of Cidofovir (HPMPC) and Cyclic HPMPC in Rats. Kenneth C. Cundy, Alison M. Bidgood, Geoffrey Lynch, Jeng-Pying Shaw, Linda Griffin, and William A. Lee .... 745

Microsomal Codeine N-Demethylation: Cosegregation with Cytochrome P4503A4 Activity. Josep Caraco, Tonomori Tateshhi, F. Peter Guengerich, and Alastair J. J. Wood .................................................. 761

Acute Dose-Dependent Disposition Studies of Nicotinic Acid in Rats. Masahiro Iwaki, Taeo Ogiso, Hirokazu Hayashi, Tadatomi Tanino, and Leslie Z. Benet .................................................. 773

Superoxide Does Not Inhibit Glyceryl Trinitrate-Rabbit Aortic Strip-Mediated Relaxation of Rabbit Taenia coli: Evidence Against a Role for Nitric Oxide Itself as the Smooth Muscle Active Drug Metabolite?. Amam J. Hussain, James F. Brien, Gerald S. Marks, and Kanji Nakatsu .................................................. 780

Continued on next page
Contents (cont’d.)

Identification of Human Liver Cytochrome P450 Isoforms Involved in the In Vitro Metabolism of Cyclobenzaprine. Regina W. Wang, Lida Liu, and Haiyung Cheng .......... 786

Uptake of Sulfate Conjugates by Isolated Rat Hepatocytes. Abdullah M. Hasen, Dennis Lam, Masato Chiba, Eugene Tan, Wanping Geng, and K. Sandy Pang .......... 792

Identification and Characterization of Human Metabolites of CAI [5-amino-1-1(4’-chlorobenzoyl-3,5-dichlorobenzyl)-1,2,3-triazole-4-carboxamide]. Mathew J. Solitis, Herman J. Yeh, Kristina A. Cole, Noel Whittaker, Robert P. Wersto, and Elise C. Kohn .......... 799

Cocaine and Alcohol Interactions in Naive and Alcohol-Pretreated Rats. Mohsen A. Hedaya and Wei-Jian Pan .......... 807
