

## Announcement

The Board of Publication Trustees regrets that, because of continued and extensive increases in costs of publication, page charges for journals published by the American Society for Pharmacology and Experimental Therapeutics must be increased to \$30.00/page as of July 1, 1975. This amount covers only a fraction of the actual cost of publication.

Page charges are billed by the Society office *after* publication of the manuscript. Billing and collection of page charges is a function of the Society office and not of the Editorial office, and is not involved in any way in editorial decisions. However, it is expected that all authors who have access to funds from which such charges can be paid will honor these charges.
