Johananoff International Fellowship for Advanced Biomedical Studies

The Mario Negri Institute Foundation, Inc. invites applications for the 1976-77 Johananoff International Fellowship for Advanced Biomedical Studies. The Fellow will spend a sabbatical year at the Mario Negri Institute for Pharmacological Research in Milan, reading, thinking, and writing, and producing an advanced study on a chosen topic. Eligible candidates are those non-Italian citizens from academic, governmental, or nonprofit institutions who are actively engaged in research in, and have made outstanding contributions to, one of the following fields: cancer chemotherapy and/or immunology, cardiovascular pharmacology, neuropsychopharmacology, or drug metabolism. The report to be prepared will be a critical analysis of the status of knowledge in a well defined area, with a prospective summary

of the directions in which research in the area should be pursued. The report will be given as a lecture and will be published as a book or review article. The stipend is \$15,000, which may be supplemented by the Fellow's home institution or from other sources.

Applications containing curriculum vitae, list of publications, pertinent reprints, and an outline (about 250 words) of the proposed study, must be mailed by January 28, 1976. The award will be announced on March 30, 1976, and the Fellow must begin his year's tenure within calendar year 1976. For further information, address the Johananoff Fellowship Committee, Istituto di Ricerche Farmacologiche "Mario Negri," Via Eritrea 62, 20157 Milan, Italy.

Symposium-workshop on Mutagenesis/Drug Metabolism

Feb. 9-10, 1976 (tentative), Research Triangle Park, N.C. Cosponsored by National Institute of Environmental Health Sciences and Division of Drug Metabolism, ASPET. Attendance limited to 250. Some volunteered papers on metabolic activation of mutagens and promutagens can be accepted. Information and advanced registration: Dr. Frederick de Serres or Dr. James R. Fouts, NIEHS, Post Office Box 12233, Re-

search Triangle Park, N.C. 27709. For registration, give name, address, phone number, affiliation, nature of your interest in the conference, and information on data, if any, which you wish to present. Acceptance of registration implies a moral commitment to attend, due to the limitations on accommodations; please do not register unless you have every intention of attending.

5th European Workshop on Drug Metabolism

June 14-18, 1976, Stockholm, Sweden. Cosponsored by Swedish Academy of Pharmaceutical Sciences and Department of Forensic Medicine, Karolinska Insti-

tutet. Information: Dr. Hans Selander, Apotekarsocieteten, Box 1136, S-11181 Stockholm, Sweden.

Editorial Acknowledgment

Essential to the success of any journal that attempts to maintain a high scholarly level of reporting of scientific research is the quality of the evaluation accorded to the submitted manuscripts. The editor is utterly dependent upon those who review these manuscripts, and all his efforts would come to naught without the devoted and conscientious service given by the reviewers. This editor shall always be grateful for the willing and excellent way in which reviewers have accepted and discharged these very time-consuming duties. A large share of the total chore is accomplished by the members of the Editorial Advisory Board, but much welcome help has come from many other members of the scientific community. The editor acknowledges with many thanks the contributions of the following scientists, each of whom has reviewed one or more manuscripts for DRUG METABOLISM AND DISPOSITION: *the biological fate of chemicals* during the first three years of its existence.

SUBJECT INDEX

- Acetaminophen, hydrolysis, effect of metyrapone, 507
Acetanilide hydroxylation, effect on, of metyrapone and related compounds, 507
Acetophenone, effect on anilide hydroxylation, 507
Acetylacetone, derivatization with, of amidino groups, 332
2-Acetylaminofluorene, metabolism in placental and fetal tissue, 494
Aldrin, disposition by perfused lung, 543
Amidino groups, derivatization with acetylacetone, 332
Amiloride, transport in central nervous system, 30
Aminopyrine N-demethylase, induction by bromazepam, 235
Amobarbital, N-hydroxylation of, in man, 479
Aniline, metabolism and disposition, in perfused liver, 63
Aniline hydroxylase, induction by bromazepam, 235
Antimalarial(s), quinolinemethanol, disposition and metabolism, 198
Antipyrene half-life, correlation with aryl hydrocarbon hydroxylase of lymphocytes, 47
Arabinosylcytosine, disposition in dog, 309
Artifact(s), control of, in drug metabolism, 417
Aryl hydrocarbon hydroxylase
 in fetal and placental tissues, 494
 in human lymphocytes, correlation with drug metabolism, 47

Benzene, hydroxylation, in lung and liver microsomes, 381
Benzphetamine, demethylation, in reconstituted rabbit lung system, 118
Benzpyrene, metabolism, in placental and fetal tissue, 494
Benzpyrene, hydroxylase, induction, in mice, 502
Biphenyl (s), polychlorinated, disposition, 371
Biphenyl hydroxylation, by purified cytochromes, 245
Bromazepam, induction of microsomal enzymes by, 235

Carbaryl
 biliary metabolites, in trout, 400
 residues from cigarette smoke, biological fate of, 513
Carbofuran, residues from cigarette smoke, biological fate of, 513
Carbon dioxide, metabolism, by propionic acid, 155
Carbon monoxide
 competition, for reduced cytochrome P-450, with nitro compounds, 266
 production, from dihalomethanes, 104

Carbon tetrachloride
 effects on hexobarbital sleeping-times, 148
 hepatotoxicity, protection against by lead nitrate, 148
Central nervous system transport, of triamterene, 30
Centrifugation, microsomal losses during, correction for, 577
Chlorobiphenyl (s), disposition, 371
Cigarette smoke, biological fate of insecticide residues from, 513
Colchicine, biliary excretion and toxicity, 530
Conjugation, taurine, of substituted phenylacetic acids, 171
Cumene hydroxide, drug oxidation supported by, 245
Current Literature, 58, 127, 230, 320, 419, 587
Cyclocytidine, metabolism and disposition, in dog, 309
p-(Cyclopropylcarbonyl)phenylacetic acid, metabolism, species differences, 171
Cyproheptadine
 epoxide metabolite, 1
 metabolism in man, 189
Cytochrome(s), purified, biphenyl hydroxylation by, 245
Cytochrome P-448
 purified
 ethoxyresorufin de-ethylation by, 245
 specificities, 245
Cytochrome P-450
 fraction, from rabbit lung, 118
 measurement, in homogenates, 577
 purified, specificities, 245

DDA
 biliary excretion, 42
 enterohepatic circulation of, 42
o, *p'*-DDD, metabolism, 15
DDT
 metabolism, 42
 residues from cigarette smoke, biological fate of, 513
Debrisoquin sulfate, metabolism, 332
Deoxycorticosterone, effect, on liver and lung drug metabolism, 254
N-Desmethylmedazepam, metabolism, in rat, 297
Dexamethasone, effect, on liver and lung drug metabolism, 254
Diazepam, metabolism, in rat, 297
Diazoxide, metabolism and disposition (review), 226
Dibromomethane, metabolism to carbon monoxide, 104
2-4-(2,2-Dichlorocyclopropyl)phenoxy-2-methylpropanoic acid, disposition, 520

- Dieldrin, disposition, by perfused lung, 543
5-(2',4'-Difluorophenyl)salicylic acid, metabolism and disposition, 453
Dihalomethane, metabolism to carbon monoxide, 104
N,N-Dimethylaniline, metabolism, in lung microsomes, effect of pregnancy on, 254
Diphenylhydantoin
 biliary excretion, 69
 metabolite, interaction with other substrates, 557
 α,α' -Dipyridyl, effect on anilide hydroxylation, 507
- Epoxide metabolite(s)
 of cyproheptadine, 1
 of protriptyline, 80
Errata, 57, 131, 233, 590
Erythromycin, metabolism, 155
Ethanol, effect on methadone absorption, 525
7-Ethoxycoumarin, de-ethylation, in reconstituted rabbit lung system, 118
Ethoxyresorufin, de-ethylation, by purified cytochrome P-448, 245
Extrahepatic drug metabolism, species differences, 259
- Fetal metabolism, of benzpyrene and 2-acetylaminofluorene, 494
Floctafenin, metabolism and disposition, 133
5-Fluorouracil, metabolite of ftorafur, 303
Fluphenazine, metabolite accumulation, 437
Formanilide, metabolism, effect of metyrapone and related compounds, 507
Ftorafur, disposition, in rats, 303
- Gastrointestinal absorption, of methadone, 525
Glucuronidation, in perfused liver, 407
Glucuronide, formation, in cat, 85
Griseofulvin, metabolism, 487
- Halothane, metabolite binding in liver, 51
Hepatotoxicity, carbon tetrachloride, protection against by lead nitrate, 148
 α -Hexachlorocyclohexane, effect on, pyrimidine synthesis, 430
Hexobarbital
 sleeping-time
 during pregnancy, 325
 effects on of carbon tetrachloride and lead nitrate, 148
D-Homoannulation, of progestins, 180
Hydrazide cleavage, of iproclozide, in man, 423
Hydrocortisone, effect, on liver and lung drug metabolism, 254
N-Hydroxyamobarbital, metabolite of amobarbital, in man, 479
Hydroxylation, biphenyl, by purified cytochromes, 245
5-(*p*-Hydroxyphenyl)-5-phenylhydantoin, interaction with other substrates, 557
3-Hydroxyphenyl-trimethyl ammonium, metabolism, in perfused liver, 275
- Imipramine, accumulation, in isolated perfused lung, 389
Insecticide, residues from cigarette smoke, biological fate of, 513
Iproclozide, hydrazide cleavage, in man, 423
Isomorphine, production, artifactual, from morphine, 417
- Kidney, drug metabolism, species differences, 259
Kidney transport, of triamterene, 30
- Lauryl sulfate, metabolism, 164
Lead nitrate
 effects, on hexobarbital sleeping times, 148
 protection by, against carbon tetrachloride hepatotoxicity, 148
Leptophos, residues from cigarette smoke, biological fate of, 513
Lipoprotein, plasma, binding of tetrahydrocannabinol by, 314
Liver, perfused, metabolism of griseofulvin in, 487
Lorazepam, glucuronidation, in cats, 85
Lung
 drug metabolism, species differences, 259
 microsomes, drug metabolism, effect of pregnancy on, 254
 perfused
 disposition of aldrin and dieldrin by, 543
 imipramine accumulation in, 389
 rabbit, reconstitution of mixed function oxidase components, 118
- Medazepam, metabolism, in rat, 297
Mefloquine, disposition and metabolism, 198
Mephenytoin, metabolism and activity, 26
Mescaline, distribution, in developing rat, 74
Metabolic activation, norethisterone, 338
Metabolite binding, in liver, from halothane, 51
Methadone, gastrointestinal absorption, 525
Methanesulfonanilide, metabolism, effect of metyrapone and related compounds, 507
Methaqualone, metabolites, in man and rat, 287
3-Methylcholanthrene
 induction, of phenacetin and benzpyrene metabolism in mice, 502
 pretreatment, effect on conjugation in perfused liver, 407
Metyrapone
 competition, for reduced cytochrome P-450, with nitro compounds, 266
 effect on anilide hydroxylation, 507
Microsomal losses, during centrifugation, correction for, 577
Microsomes, lung, drug metabolism, effect of pregnancy on, 254
Milk of Magnesia, effect on methadone absorption, 525
Mitotane, metabolism, 15
Morphine, artifactual false metabolite, 417

- NADPH, cytochrome *c* reductase, purification from rabbit lung, 118
- Nafenopin, effect on hepatic uptake and biliary excretion of ouabain, 220
- Neostigmine, metabolism, in perfused liver, 275
- Niflumic acid, microsomal hydroxylation of, 96
- Nirvanol, metabolism and activity, 26
- Nitro compounds, difference spectra, with reduced cytochrome P-450, 266
- Nitrofurylthiazolylacetamide, metabolism and disposition, 89
- p*-Nitrophenyl, conjugation, in perfused liver, 407
- Norethisterone, metabolic activation, to protein-binding metabolite, 338
- Norgestrel, metabolism, stereoselective, in women, 180
- Ouabain, hepatic uptake and biliary excretion, effect of nafenopin on, 220
- Oxisuran, metabolism, in monkey, 10
- Parathion, residues from cigarette smoke, biological fate of, 513
- 2,4,5,2',5' Pentachlorobiphenyl, disposition, 211
- Pentobarbital, R-(+) and S(-), microsomal metabolism, 113
- Perphenazine, metabolite accumulation, 437
- Phenacetin O-dealkylation, induction, in mice, 502
- Phenol, metabolism, in lung and liver microsomes, 381
- Phenylacetic acid(s), substituted, metabolism, species differences, 171
- Phenylbutazone half life, correlation with aryl hydrocarbon hydroxylase of lymphocytes, 47
- Phospholipid binding, of halothane metabolite, 51
- Placental metabolism, of benzpyrene and 2 acetylaminofluorene, 494
- Placental transport, of triamterene, 30
- Polyoxypropylene-polyoxyethylene copolymer, disposition in rat, 536
- Pregnancy
 drug metabolism during, in rat, 325
 effect
 on drug metabolism in lung microsomes, 254
 on liver and lung drug metabolism, 254
 on metabolism of N,N-dimethylaniline in lung microsomes, 254
- Prochlorperazine, metabolite accumulation, 437
- Progestins
 aromatization of, 180
 D-homoannulation of, 180
- Propionanilide, metabolism, effect of metyrapone and related compounds, 507
- Propionic acid, metabolism to carbon dioxide, 155
- Propionyl erythromycin, and lauryl sulfate salts, metabolism of, 155
- Propionyl erythromycin lauryl sulfate, metabolism, 164
- Protriptyline, epoxide metabolites, 80
- Pyrimidine, synthesis, effect of α -hexachlorocyclohexane on, 430
- Quaternary ammonium compounds, disposition, in perfused liver, 275
- Quinolinemethanol, antimalarials, disposition and metabolism, 198
- Salicylic acid, difluorophenyl-, metabolism and disposition, 453
- SKF 525-A, effect on aniline disposition in perfused liver, 63
- Species differences, extrahepatic drug metabolism, 259
- Spirolactone, metabolism in man, 467
- Sulfacetamide, distribution, in tumor-bearing rat, 565
- Sulfation, in perfused liver, 407
- Taurine, conjugation, of substituted phenylacetic acids, 171
- Δ^9 -Tetrahydrocannabinol, binding, by plasma lipoproteins, 314
- Timalol, metabolism and disposition, 361
- Tolmetin, metabolism, 283
- Triamterene
 metabolism, in rat, 345
 transport, in central nervous system, kidney, placenta, 30
- Trifluazepam, biotransformation, in man, 352
- Trifluzepam, metabolism, comparative, in rats, dogs, and monkeys, 445
- Trifluoperazine, metabolite accumulation, 437
- Tumor-bearing rat, sulfacetamide distribution in, 565
- Walker 256 tumor, sulfacetamide distribution in rats bearing, 565
- WR 30,090, disposition and metabolism, 198

6875-59-211-
