*Science is built up of facts, as a house
is built of stones; but an accumulation
of facts is no more a science than a
heap of stones is a house*

Simcyp consultancy...

building prospective clinical knowledge from your in vitro ADME data

Simcyp is the leader in mechanistic pharmacokinetics with an international reputation in *in vitro* - *in vivo* extrapolation of ADME data. In addition to licensing the Simcyp Simulator we offer consultancy services on all aspects of drug absorption, distribution, metabolism & elimination (ADME) and pharmacokinetic-pharmacodynamic (PK-PD) data analysis and interpretation..

There are four ways to take advantage of Simcyp Consultancy:

Let Simcyp analyse your data...

Using your data, Simcyp's scientists can provide advice on the design of your ADME experiments and deliver independent analysis interpretation and report. This service is ideally suited to those clients who do not have the resource, time or need to use our simulation technology directly.

Become part of Simcyp...

Send your scientist(s) and data to Simcyp's R&D centre in Sheffield, UK, for a short residential period. In addition to hands-on access to the Simcyp Population-based ADME Simulator, our specialist science team will be continuously available for technical support and advice on your specific project.

Connect with Simcyp expertise on-line...

Gain access to our Simulator and specialist science team on-line. This may be the preferred option for the more experienced Simulator user.

Consultancy tailored to your specific needs...

We can combine any of the above approaches to suit the demands of your project.
