

# DRUG METABOLISM AND DISPOSITION

A Publication of the American Society for Pharmacology and Experimental Therapeutics

September 2009

Vol. 37, No. 9

## CONTENTS

### SHORT COMMUNICATIONS

- Glucuronidation of the Antiretroviral Drug Efavirenz by UGT2B7 and an in Vitro Investigation of Drug-Drug Interaction with Zidovudine. *Anne-Sophie Bélanger, Patrick Caron, Mario Harvey, Peter A. Zimmerman, Rajeev K. Mehlotra, and Chantal Guillemette* . . . . . **1793**

- Aromatic Substitution Reaction of 2-Chloropyridines Catalyzed by Microsomal Glutathione *S*-Transferase 1. *Kazuko Inoue, Tomoyuki Ohe, Kenichi Mori, Takeshi Sagara, Yasuyuki Ishii, and Masato Chiba* . . . . . **1797**

- Contrasting Influence of NADPH and a NADPH-Regenerating System on the Metabolism of Carbonyl-Containing Compounds in Hepatic Microsomes. *Christopher S. Mazur, John F. Kenneke, Michael-Rock Goldsmith, and Cather Brown* . . . . . **1801**

### ARTICLES

- Bioactivation of Minocycline to Reactive Intermediates by Myeloperoxidase, Horseradish Peroxidase, and Hepatic Microsomes: Implications for Minocycline-Induced Lupus and Hepatitis. *Baskar Mannargudi, David McNally, William Reynolds, and Jack Utrecht* . . . . . **1806**

- Age- and Sex-Related Expression and Activity of Carboxylesterase 1 and 2 in Mouse and Human Liver. *Hao-Jie Zhu, David I. Appel, Yan Jiang, and John S. Markowitz* . . . . . **1819**

- Identification and Profiling of Circulating Metabolites of Atazanavir, a HIV Protease Inhibitor. *R. ter Heine, M. J. X. Hillebrand, H. Rosing, E. C. M. van Gorp, J. W. Mulder, J. H. Beijnen, and A. D. R. Huitema* . . . . . **1826**

- Up-Regulation of UDP-Glucuronosyltransferase (UGT) 1A4 by 17 $\beta$ -Estradiol: A Potential Mechanism of Increased Lamotrigine Elimination in Pregnancy. *Huiqing Chen, Kyunghee Yang, Suyoung Choi, James H. Fischer, and Hyunyoung Jeong* . . . . . **1841**

- In Vitro Inhibition of Multiple Cytochrome P450 Isoforms by Xanthone Derivatives from Mangosteen Extract. *Robert S. Foti, Josh T. Pearson, Dan A. Rock, Jan L. Wahlstrom, and Larry C. Wienkers* . . . . . **1848**

- Involvement of Human Organic Cation Transporter 1 in the Hepatic Uptake of 1-(2-Methoxyethyl)-2-methyl-4,9-dioxo-3-(pyrazin-2-ylmethyl)-4,9-dihydro-1*H*-naphtho[2,3-*d*]imidazolium Bromide (YM155 Monobromide), a Novel, Small Molecule Survivin Suppressant. *Megumi Iwai, Tsuyoshi Minematsu, Shinichi Narikawa, Takashi Usui, and Hidetaka Kamimura* . . . . . **1856**

- Modulation of the Partition Coefficient between Octanol and Buffer at pH 7.4 and  $pK_a$  to Achieve the Optimum Balance of Blood Clearance and Volume of Distribution for a Series of Tetrahydropyran Histamine Type 3 Receptor Antagonists. *Tanya Hay, Rhys Jones, Kevin Beaumont, and Mark Kemp* . . . . . **1864**

- Changes in mRNA Expression Levels of Solute Carrier Transporters in Inflammatory Bowel Disease Patients. *Kacper A. Wojtal, Jyrki J. Eloranta, Petr Hruz, Heike Gutmann, Jürgen Drewe, Alex Staumann, Christoph Beglinger, Michael Fried, Gerd A. Kullak-Ublick, and Stephan R. Vavricka* . . . . . **1871**

Continued on next page

Effect of Membrane Cholesterol on BSEP/Bsep Activity: Species Specificity Studies for Substrates and Inhibitors. <i>Emese Kis, Enikő Iojá, Tunde Nagy, Lajos Szente, Krisztina Herédi-Szabó, and Péter Krajcsi</i> . . . . .	<b>1878</b>	Inhibition of Human CYP2B6-Catalyzed Bupropion Hydroxylation by <i>Ginkgo biloba</i> Extract: Effect of Terpene Trilactones and Flavonols. <i>Aik Jiang Lau and Thomas K. H. Chang</i> . . . . .	<b>1931</b>
Methadone Induces the Expression of Hepatic Drug-Metabolizing Enzymes through the Activation of Pregnane X Receptor and Constitutive Androstane Receptor. <i>Antonia H. Tolson, Haishan Li, Natalie D. Eddington, and Hongbing Wang</i> . . . . .	<b>1887</b>	3-Ketocholanoic Acid Is the Major in Vitro Human Hepatic Microsomal Metabolite of Lithocholic Acid. <i>Anand K. Deo and Stelvio M. Bandiera</i> . . . . .	<b>1938</b>
Substrate-Dependent Functional Alterations of Seven CYP2C9 Variants Found in Japanese Subjects. <i>Keiko Maekawa, Noriko Harakawa, Emiko Sugiyama, Masahiro Tohkin, Su-Ryang Kim, Nahoko Kaniwa, Noriko Katori, Ryuichi Hasegawa, Kazuki Yasuda, Kei Kamide, Toshiyuki Miyata, Yoshiro Saito, and Jun-ichi Sawada</i> . . . . .	<b>1895</b>	Influence of N-Terminal Domain Histidine and Proline Residues on the Substrate Selectivities of Human UDP-Glucuronosyltransferase 1A1, 1A6, 1A9, 2B7, and 2B10. <i>Oranun Kerdpin, Peter I. Mackenzie, Kushari Bowalgaha, Moshe Finel, and John O. Miners</i> . . . . .	<b>1948</b>
Metabolism of Ticlopidine in Rats: Identification of the Main Biliary Metabolite as a Glutathione Conjugate of Ticlopidine S-Oxide. <i>Shinji Shimizu, Ryo Atsumi, Tsunenori Nakazawa, Yuko Fujimaki, Kenichi Sudo, and Osamu Okazaki</i> . . . . .	<b>1904</b>	Culture Period-Dependent Change of Function and Expression of ATP-Binding Cassette Transporters in Caco-2 Cells. <i>Emi Kamiyama, Daisuke Sugiyama, Daisuke Nakai, Shin-ichi Miura, and Osamu Okazaki</i> . . . . .	<b>1956</b>
Sex-Dependent Disposition of Acetaminophen Sulfate and Glucuronide in the in Situ Perfused Mouse Liver. <i>Jin Kyung Lee, Koji Abe, Arlene S. Bridges, Nita J. Patel, Thomas J. Raub, Gary M. Pollack, and Kim L. R. Brouwer</i> . . . . .	<b>1916</b>	Thyroid Hormone Is Necessary for Expression of Constitutive Androstane Receptor in Rat Hepatocytes. <i>Hidekazu Ooe, Junko Kon, Hideki Oshima, and Toshihiro Mitaka</i> . . . . .	<b>1963</b>
An in Vitro Evaluation of the Victim and Perpetrator Potential of the Anticancer Agent Laromustine (VNP40101M), Based on Reaction Phenotyping and Inhibition and Induction of Cytochrome P450 Enzymes. <i>Alaa-Eldin F. Nassar, Ivan King, Brandy L. Paris, Lois Haupt, Florence Ndikum-Moffor, Rebecca Campbell, Etsuko Usuki, Jennifer Skibbe, Dan Brobst, Brian W. Ogilvie, and Andrew Parkinson</i> . . . . .	<b>1922</b>	A Zone Classification System for Risk Assessment of Idiosyncratic Drug Toxicity Using Daily Dose and Covalent Binding. <i>Shintaro Nakayama, Ryo Atsumi, Hideo Takakusa, Yoshimasa Kobayashi, Atsushi Kurihara, Yoko Nagai, Daisuke Nakai, and Osamu Okazaki</i> . . . . .	<b>1970</b>
		□ Genetic Polymorphisms in the TATA Box and Upstream Phenobarbital-Responsive Enhancer Module of the <i>UGT1A1</i> Promoter Have Combined Effects on UDP-Glucuronosyltransferase 1A1 Transcription Mediated by Constitutive Androstane Receptor, Pregnane X Receptor, or Glucocorticoid Receptor in Human Liver. <i>Ye Li, David Buckley, Shuang Wang, Curtis D. Klaassen, and Xiao-bo Zhong</i> . . . . .	<b>1978</b>

□ Supplemental material is available online at <http://dmd.aspetjournals.org>.

About the cover: Zone classification of IDT risk assessment in accordance with daily dose and covalent binding in human hepatocytes. See article by Nakayama et al. on page 1970 of this issue.
