

DRUG METABOLISM AND DISPOSITION

A Publication of the American Society for Pharmacology and Experimental Therapeutics

November 2011

Vol. 39, No. 11

CONTENTS

ANNOUNCEMENT

James E. Barrett 1997

SHORT COMMUNICATIONS

Investigation on the Enantioselectivity of the Sulfation of the Methylenedioxyamphetamine Metabolites 3,4-Dihydroxymethamphetamine and 4-Hydroxy-3-Methoxymethamphetamine using the Substrate-Depletion Approach. *Andrea E. Schwaninger, Markus R. Meyer, and Hans H. Maurer* 1998

Effect of Estradiol on Gene Expression Profile in Cynomolgus Macaque Liver: Implications for Drug-Metabolizing Enzymes. *Yasuhiro Uno and Go Kito* 2003

Bioavailability of the Glucuronide and Sulfate Conjugates of Genistein and Daidzein in Breast Cancer Resistance Protein 1 Knockout Mice. *Ana I. Alvarez, Fernando Vallejo, Borja Barrera, Gracia Merino, Julio G. Prieto, Francisco Tomás-Barberán, and Juan C. Espín* 2008

The Deaminated Metabolite of Gemcitabine, 2',2'-Difluorodeoxyuridine, Modulates the Rate of Gemcitabine Transport and Intracellular Phosphorylation via Deoxycytidine Kinase. *Lucy S. Hodge, Mitchell E. Taub, and Timothy S. Tracy* 2013

Pharmacokinetic Differences Corroborate Observed Low Tacrolimus Dosage in Native American Renal Transplant Patients. *Anita Grover, Lynda A. Frassetto, Leslie Z. Benet, and Harini A. Chakrera* 2017

ARTICLES

The Proton Pump Inhibitor, Omeprazole, but Not Lansoprazole or Pantoprazole, Is a Metabolism-

Dependent Inhibitor of CYP2C19: Implications for Coadministration with Clopidogrel. *Brian W. Ogilvie, Phyllis Yerino, Faraz Kazmi, David B. Buckley, Amin Rostami-Hodjegan, Brandy L. Paris, Paul Toren, and Andrew Parkinson* 2020

Absorption and Disposition of Scutellarin in Rats: A Pharmacokinetic Explanation for the High Exposure of Its Isomeric Metabolite. *Chunying Gao, Xiaoyan Chen, and Dafang Zhong* 2034

Q172H Replacement Overcomes Effects on the Metabolism of Cyclophosphamide and Efavirenz Caused by CYP2B6 Variant with Arg262. *Noritaka Ariyoshi, Miyuki Ohara, Mayumi Kaneko, Sakino Afuso, Takuya Kumamoto, Hiroyoshi Nakamura, Itsuko Ishii, Tsutomu Ishikawa, and Mitsukazu Kitada* 2045

Cannabidiol, a Major Phytocannabinoid, As a Potent Atypical Inhibitor for CYP2D6. *Satoshi Yamaori, Yasuka Okamoto, Ikuo Yamamoto, and Kazuhito Watanabe* 2049

Progesterone Receptor Membrane Component 1 Modulates Human Cytochrome P450 Activities in an Isoform-Dependent Manner. *Shingo Oda, Miki Nakajima, Yasuyuki Toyoda, Tatsuki Fukami, and Tsuyoshi Yokoi* 2057

Evaluation of Three State-of-the-Art Metabolite Prediction Software Packages (Meteor, MetaSite, and StarDrop) through Independent and Synergistic Use. *H. T'jollyn, K. Boussery, R. J. Mortishire-Smith, K. Coe, B. De Boeck, J. F. Van Bocxlaer, and G. Mannens* 2066

Utilizing Drug-Drug Interaction Prediction Tools during Drug Development: Enhanced Decision Mak-

Continued on next page

- ing Based on Clinical Risk. *Carole E. Shardlow, Grant T. Generaux, Christopher C. MacLaughlin, Nicoletta Pons, Konstantine W. Skordos, and Jackie C. Bloomer* **2076**
- ▣ Determination of Time-Dependent Inactivation of CYP3A4 in Cryopreserved Human Hepatocytes and Assessment of Human Drug-Drug Interactions. *Yuan Chen, Liling Liu, Mario Monshouer, and Adrian J. Fretland* **2085**
- Digoxin Is Not a Substrate for Organic Anion-Transporting Polypeptide Transporters OATP1A2, OATP1B1, OATP1B3, and OATP2B1 but Is a Substrate for a Sodium-Dependent Transporter Expressed in HEK293 Cells. *Mitchell E. Taub, Kirsten Mease, Rucha S. Sane, Cory A. Watson, Liangfu Chen, Harma Ellens, Brad Hirakawa, Eric L. Reyner, Marton Jani, and Caroline A. Lee* **2093**
- Species Differences in Distribution and Prediction of Human V_{ss} from Preclinical Data. *Loren M. Berry, Chao Li, and Zhiyang Zhao* **2103**
- ▣ Bovine Serum Albumin Decreases K_m Values of Human UDP-Glucuronosyltransferases 1A9 and 2B7 and Increases V_{max} Values of UGT1A9. *Ne-nad Manevski, Paolo Svaluto Moreolo, Jari Yli-Kauhaluoma, and Moshe Finel* **2117**
- Cytochrome P450 Pig Liver Pie: Determination of Individual Cytochrome P450 Isoform Contents in Microsomes from Two Pig Livers Using Liquid Chromatography in Conjunction with Mass Spectroscopy. *Brahim Achour, Jill Barber, and Amin Rostami-Hodjegan* **2130**
- ▣ Methionine Adenosyltransferase 2A/2B and Methylation: Gene Sequence Variation and Functional Genomics. *Kendra K. S. Nordgren, Yi Peng, Linda L. Pelleymounter, Irene Moon, Ryan Abo, Qiping Feng, Bruce Eckloff, Vivien C. Yee, Eric Wieben, and Richard M. Weinshilboum* **2135**
- PDZK1 Regulates Breast Cancer Resistance Protein in Small Intestine. *Takuya Shimizu, Tomoko Sugiura, Tomohiko Wakayama, Ai Kijima, Noritaka Nakamichi, Shoichi Iseki, David L. Silver, and Yukio Kato* **2148**
- Dose-Dependent Disposition of Methotrexate in *Abcc2* and *Abcc3* Gene Knockout Murine Models. *Zhan Wang, Qingyu Zhou, Gary D. Kruh, and James M. Gallo* **2155**

ACCELERATED COMMUNICATION

- Effect of Dimethyl Sulfoxide on In Vitro Cytochrome P4501A2 Mediated Phenacetin O-Deethylation in Human Liver Microsomes. *Ramakrishna Nirogi, Vishwottam Kandikere, Gopinadh Bhyrapuneni, Ranjith Kumar Ponnamaneni, Raghava choudary Palacharla, and Arunkumar Manoharan* **2162**

▣ Supplemental material is available online at <http://dmd.aspetjournals.org>.

About the cover: Proposed action of key ABC transporters involved in the pharmacokinetics of MTX in liver hepatocytes and renal proximal tubules as a function of dose in WT (A), *Abcc2*(-/-) (B), and *Abcc3*(-/-) (C) strains. See the article by Wang et al. on page 2155 of this issue.
