CONTENTS

COMMENTARY
Nonspecific Protein Binding versus Membrane Partitioning: It Is Not Just Semantics. Swati Nagar and Ken Korzekwa ........................................ 1649

SHORT COMMUNICATION
Risk Assessment of Mechanism-Based Inactivation in Drug-Drug Interactions. Yasushi Fujioka, Kent L. Kuze, and Nina Isoherranen ................. 1653

ARTICLES
A Novel Ring Oxidation of 4- or 5-Substituted 2H-Oxazole to Corresponding 2-Oxazolone Catalyzed by Cytosolic Aldehyde Oxidase. Vinod K. Arora, Thomas Philip, Stella Huang, and Yue-Zhong Shu ........................................ 1668
Selective Mechanism-Based Inactivation of CYP3A4 by CYP3cide (PF-04981517) and Its Utility as an In Vitro Tool for Delineating the Relative Roles of CYP3A4 versus CYP3A5 in the Metabolism of Drugs. Robert L. Walsky, R. Scott Obach, Ruth Hyland, Ping Kang, Sue Zhou, Michael West, Kieran F. Geoghegan, Christopher J. Helal, Gregory S. Walker, Theunis C. Goosen, and Michael A. Zientek ........................................ 1686
Evaluation of Six Proton Pump Inhibitors As Inhibitors of Various Human Cytochromes P450: Focus on Cytochrome P450 2C19, Tatyana Zvyaga, Shu-Ying Chang, Cliff Chen, Zheng Yang, Ragini Vuppugalla, Jeremy Hurley, Denise Thorndike, Andrew Wagner, Anjaneya Chimalakonda, and A. David Rodrigues ........................................ 1698
Metabolism and Pharmacokinetics of Indacaterol in Humans. Mark Kagan, Jeremy Dain, Lan Peng, and Christine Reynolds ........................................ 1712
Excretion and Metabolism of Milnacipran in Humans after Oral Administration of Milnacipran Hydrochloride. Fanying Li, Christina Chin, Julie Wangsa, and John Ho ........................................ 1723
Role of Human UDP-Glucuronosyltransferases in the Biotransformation of the Triazoloacridinone and Imidazoacridinone Antitumor Agents C-1305 and C-1311: Highly Selective Substrates for UGT1A10. Barbara Fedelko-Kap, Stacie M. Bratton, Moshe Finel, Anna Radomska-Pandya, and Zofia Mazerska ........................................ 1736
Use of Mechanistic Modeling to Assess Interindividual Variability and Interspecies Differences in Active Uptake in Human and Rat Hepatocytes. Karelle Ménocet, Kathryn E. Kenworthy, J. Brian Houston, and Aleksandra Galetin ........................................ 1744
Evaluation of P450 Inhibition and Induction by Artemisinin Antimalarials in Human Liver Microsomes and Primary Human Hepatocytes. Jie Xing, Brian J. Kirby, Dale Whittington, Yakun Wan, and David R. Goodlett ........................................ 1757
Mechanism-Based Inactivation of Cytochrome P450 2B6 by Methadone through Destruction of Prosthetic Heme. Hemali T. Amanugama, Haoming Zhang, and Paul F. Hollenberg ........................................ 1765
Quantitative Predictive of Human Intestinal Glucuronidation Effects on Intestinal Availability of UDP-Glucuronosyltransferase Substrates Using In Vitro Data. Fumihiko Nakamori, Yoichi Naritomi, Ken-ichi Hosoya, Hiroyuki Moriguchi, Kazuhiro Tetsuka, Tâkako Furukawa, Keitaro Kadono, Katsuhiro Yamano, Shigeyuki Terashita, and Toshio Teramura ........................................ 1771

at ASPET Journals on March 25, 2022 dmd.aspetjournals.org Downloaded from
Metabolism of the Active Metabolite of Quetiapine, N-Desalkylquetiapine In Vitro. Gry Vibeke Bakken, Espen Molden, Karoline Kntusen, Niclas Lunder, and Monica Hermann

Preclinical Assessment of the Absorption and Disposition of the Phosphatidylinositol 3-Kinase/Mammalian Target of Rapamyacin Inhibitor GDC-0980 and Prediction of Its Pharmacokinetics and Efficacy in Human. Laurent Salphati, Jodie Pang, Emile G. Plise, Leslie B. Lee, Alan G. Olivero, Wei Wei Prior, Deepak Sampath, Susan Wong, and Xiaolin Zhang

Evaluation of Inhibition Selectivity for Human Cytochrome P450 2A Enzymes. Eva S. Stephens, Agnes A. Walsh, and Emily E. Scott

Discovery of a Highly Selective CYP3A4 Inhibitor Suitable for Reaction Phenotyping Studies and Differentiation of CYP3A4 and CYP3A5. Xiaohai Li, Xinyi Song, Theodore M. Kamenecka, and Michael D. Cameron

Preclinical Evaluation of the Metabolism and Disposition of RRx-001, a Novel Investigative Anti-cancer Agent. Jan Scicinski, Bryan Oronsky, Michael Taylor, Gang Luo, Timothy Musick, Joseph Marini, Christopher M. Adams, and William L. Fitch

Characterization of SAGE Mdr1a (P-gp), Bcrp, and Mrp2 Knockout Rats Using Loperamide, Paclitaxel, Sulfasalazine, and Carboxydi chlorofluorescein Pharmacokinetics. Maciej J. Zamek-Gliszczyński, David W. Bedwell, Jing Q. Bao, and J. William Higgins

Influence of Enterohepatic Recycling on the Time Course of Brain-to-Blood Partitioning of Valproic Acid in Rats. Jeannie M. Padowski and Gary M. Pollack

Glutaredoxin Is Involved in the Formation of the Pharmacologically Active Metabolite of Clopidogrel from Its GSH Conjugate. Katsunobu Hagihara, Miho Kazui, Atsushi Kurihara, Toshihiko Ikeda, and Takashi Izumi

ACCELERATED COMMUNICATION

ERRATA

Correction to “Identification of Novel Metoclopramide Metabolites in Human: In Vitro and In Vivo Studies” 1866

Correction to “Identification and Validation of Novel Human Pregnanex X Receptor Activators among Prescribed Drug via Ligand-Based Virtual Screening” 1868
