

## Correction to “A Role for the Orphan Human Cytochrome P450 2S1 in Polyunsaturated Fatty Acid $\omega$ -1 Hydroxylation Using an Untargeted Metabolomic Approach”

In the above article [Fekry MI, Xiao Y, Berg JZ, and Guengerich FP (2019) *Drug Metab and Dispos* November 2019, 47 (11) 1325-1332; DOI: <https://doi.org/10.1124/dmd.119.089086> ], in Figure 4D the  $m/z$  peak labeled “275.2019” should be changed to “273.1863”. The mistake was found to be due to mislabeling by a mass spectrometry software error that was not caught by the authors at the proof stage. This change does not change the interpretation of the results. The corrected figure 4 is displayed below and in the PDF and HTML versions of this article.

The authors apologize for any inconvenience caused by these errors.
