# CONTENTS

## SPECIAL SECTION ON DRUG METABOLISM IN LIVER INJURY AND REPAIR

**Special Section On Drug Metabolism in Liver Injury and Repair—Editorial.** Xiao-bo Zhong and Yurong Lai ........................................ 634

- Nuclear Receptor-Mediated Hepatomegaly and Liver Regeneration: An Update. Pengfei Zhao, Shicheng Fan, Yue Gao, Min Huang, and Huichang Bi .............. 636

- Roles of Cofactors in Drug-Induced Liver Injury: Drug Metabolism and Beyond. Ruizhi Gu, Alina Liang, Grace Liao, Isabelle To, Amina Shehu, and Xiaochao Ma ........................................ 646

- Metabolic Activation and Hepatotoxicity of Furan-Containing Compounds. Min Tian, Ying Peng, and Jiang Zheng ........................................ 655

- Novel Clinical Biomarkers for Drug-Induced Liver Injury. Youhao Chen, Shaoxing Guan, Yanping Guan, Siyuan Tang, Yanying Zhou, Xueding Wang, Huichang Bi, and Min Huang .............. 671

- Alterations of Cytochrome P450-Mediated Drug Metabolism during Liver Repair and Regeneration after Acetaminophen-Induced Liver Injury in Mice. Yifan Bao, Mi Phan, Junjie Zhu, Xiaochao Ma, José E. Manautou, and Xiaobo Zhong ........................................ 694

- Long Noncoding RNAs Hepatocyte Nuclear Factor 4A Antisense RNA 1 and Hepatocyte Nuclear Factor 1A Antisense RNA 1 Are Involved in Ritonavir-Induced Cytoxicity in Hepatoma Cells. Xiaofei Wang, Yihang Yu, Pei Wang, Kun Yang, Yiting Wang, Liang Yan, Xiao-bo Zhong, and Limeng Zhang ......................... 704

## MINIREVIEW

- Adenosine-to-Inosine RNA Editing and N6-Methyladenosine Modification Modulating Expression of Drug Metabolizing Enzymes. Masataka Nakano and Miki Nakajima ........................................ 624

## ARTICLES

- Predicting Regional Respiratory Tissue and Systemic Concentrations of Orally Inhaled Drugs through a Novel PBPK Model. Mayur K. Ladumor and Jashvant D. Unadkat ........................................ 519

- Direct and Sequential Bioactivation of Pemigatinib to Reactive Iminium Ion Intermediates Culminates in Mechanism-Based Inactivation of Cytochrome P450 3A. Lloyd Wei Tat Tang, Wan Wei, Ravi Kumar Verma, Siew Kwan Koh, Lei Zhou, Hao Fan, and Eric Chun Yong Chan ........................................ 529

- Experimental and Modeling Evidence Supporting the Trans-Inhibition Mechanism for Preincubation Time-Dependent, Long-Lasting Inhibition of Organic Anion Transporting Polypeptide 1B1 by Cyclosporine A. Saki Izumi, Yoshitane Nozaki, Woon Lee, and Yuichi Sugiyama ........................................ 541

- Inhibition of Human UDP-Glucuronosyltransferases1A1–Mediated Bilirubin Glucuronidation by the Popular Flavonoids Baicalein, Baicalin, and Hyperoside Is Responsible for Herb (Shuang-Huang-Lian)-Induced Jaundice. Xiaolei Yang, Guanghao Zhu, Ying Zhang, Xubo Wu, Bei Liu, Ye Liu, Qing Yang, Wandi Du, Jingru Liang, Jiarong Hu, Ping Yang, Guangbo Ge, Weimin Cai, and Guo Ma ........................................ 552

E4BP4 Regulates Hepatic Solute Carrier Family 2 Member 9 and Uric Acid Disposition in Mice. Zhigang Wang, Lu Gao, Shujing Ren, Guanghui Sun, Yanke Lin, Shuai Wang, and Baojian Wu ... 591

Absorption, Distribution, Metabolism, and Excretion of [14C]-Sotorasib in Rats and Dogs: Interspecies Differences in Absorption, Protein Conjugation and Metabolism. Upendra P. Dahal, Brooke M. Rock, John Rodgers, Xiaomeng Shen, Zhe Wang, and Jan L. Wahlstrom.................600

Estimation of Fetal-to-Maternal Unbound Steady-State Plasma Concentration Ratio of P-Glycoprotein and/or Breast Cancer Resistance Protein Substrate Drugs Using a Maternal-Fetal Physiologically Based Pharmacokinetic Model. Jinfu Peng, Mayur K. Ladumor, and Jashvant D. Unadkat........ 613

Methionine Sulfoxide Reductase A in Human and Mouse Tissues is Responsible for Sulindac Activation, Making a Larger Contribution than the Gut Microbiota. Keiya Hirosawa, Tatsuki Fukami, Mai Nagaoka, Masataka Nakano, and Miki Nakajima.................. 725

Supplemental material is available online at http://dmd.aspetjournals.org.

About the cover: YAP signaling pathway mediates CAR-, PXR- or PPARα-induced hepatomegaly and liver regeneration. See the article by Zhao et al. (dx.doi.org/10.1124/dmd.121.000454).
