

# DRUG METABOLISM AND DISPOSITION

A Publication of the American Society for Pharmacology and Experimental Therapeutics

January 2023

Vol. 51, No. 1

## CONTENTS

### 50TH ANNIVERSARY CELEBRATION COLLECTION

- Celebrating 50 Years of Excellence in DMD Science. Xinxin Ding, Editor-in-Chief. . . . .* **96**
- Drug Metabolism: A Half-Century Plus of Progress, Continued Needs, and New Opportunities. *F. Peter Guengerich . . . . .* **99**
- The Evolution of *Drug Metabolism and Disposition*: A Perspective From the Editors. *Edward T. Morgan, Raymond F. Novak, James R. Halpert, Eric F. Johnson, and Jeffrey C. Stevens . . . . .* **105**
- Four Decades of Cytochrome P450 2B Research: From Protein Adducts to Protein Structures and Beyond. *Arthur G. Roberts, Jeffrey C. Stevens, Grazyna D. Szklarz, Emily E. Scott, Santosh Kumar, Manish B. Shah, and James R. Halpert . . . . .* **111**
- Species Specificity and Selection of Models for Drug Oxidations Mediated by Polymorphic Human Enzymes. *Hiroshi Yamazaki and Makiko Shimizu . . . . .* **123**
- COVID-19 Vaccines and the Virus: Impact on Drug Metabolism and Pharmacokinetics. *Eliza R. McColl, Maria A. Croyle, William C. Zamboni, William G. Honer, Mark Heise, Micheline Piquette-Miller, and Kerry B. Goralski. . . . .* **130**

### ARTICLES

- [S] Cytochrome P450 Transcriptional Regulation by Testis-Specific Y-Encoded-Like Protein: Identification of Novel Upstream Transcription Factors. *Suganti Shivaram, Huanyao Gao, Sisi Qin, Duan Liu, Richard M. Weinshilboum, and Liewei Wang. . . . .* **1**
- [S] Covalent Binding Mechanism of Furmonertinib and Osimertinib With Human Serum Albumin. *Yali Wu, Lili Chen, Jian Chen, Hao Xue, Qingfeng He, Dafang Zhong, and Xingxing Diao . . . . .* **8**
- Quantitative Evaluation of the Contribution of Each Aldo-Keto Reductase and Short-Chain Dehydrogenase/Reductase Isoform to Reduction Reactions of Compounds Containing a Ketone Group in the Human Liver. *Hiroyuki Ichida, Tatsuki Fukami, Keito Amai, Kohei Suzuki, Kenji Mishiro,*

*Shiori Takano, Wataru Obuchi, Zhengyu Zhang, Akiko Watanabe, Masataka Nakano, Kengo Watanabe, and Miki Nakajima. . . . .* **17**

- [S] CYP2C19 Plays a Major Role in the Hepatic N-Oxidation of Cotinine. *Yadira X. Perez-Paramo, Christy J.W. Watson, Gang Chen, and Philip Lazarus . . . . .* **29**

A Comprehensive Investigation of Dog Cytochrome P450 3A (CYP3A) Reveals a Functional Role of Newly Identified CYP3A98 in Small Intestine. *Yasuhiro Uno, Shiori Jikuya, Yutaro Noda, Norie Murayama, and Hiroshi Yamazaki . . . . .* **38**

- [S] Detection of Transgene Location in the CYP2A13/2B6/2F1-transgenic Mouse Model using Optical Genome Mapping Technology. *Xinxin Ding, John Han, Laura S. Van Winkle, and Qing-Yu Zhang . . . . .* **46**

- [S] Stereoselective Metabolism of Bupropion to Active Metabolites in Cellular Fractions of Human Liver and Intestine. *Nadia O Bamfo, Jessica BL Lu, and Zeruesenay Desta . . . . .* **54**

- [S] Physiologically Based Pharmacokinetic Modeling for Quantitative Prediction of Exposure to a Human Disproportionate Metabolite of the Selective Na<sub>v</sub>1.7 Inhibitor DS-1971a, a Mixed Substrate of Cytochrome P450 and Aldehyde Oxidase, Using Chimeric Mice With Humanized Liver. *Daigo Asano, Koichi Nakamura, Yumi Nishiya, Hideyuki Shiozawa, Hideo Takakusa, Takahiro Shibayama, Shin-ichi Inoue, Tsuyoshi Shinozuka, Takakazu Hamada, Chizuko Yahara, Nobuaki Watanabe, and Kouichi Yoshinari. . . . .* **67**

- [S] Sexual Dimorphism in the Expression of Cytochrome P450 Enzymes in Rat Heart, Liver, Kidney, Lung, Brain, and Small Intestine. *Samar H. Gerges and Ayman O.S. El-Kadi . . . . .* **81**

- [S] Gut Microbiome-Wide Search for Bacterial Azoreductases Reveals Potentially Uncharacterized Azoreductases Encoded in the Human Gut Microbiome. *Domenick J. Braccia, Glory Minabou Ndjite, Ashley Weiss, Sophia Levy, Stephenie Abeyasinghe, Xiaofang Jiang, Mihai Pop, and Brantley Hall . . . . .* **142**

## ERRATUM

Correction to “Identification of 5-Hydroxycotinine in the Plasma of Nicotine-Treated Mice: Implications for Cotinine Metabolism and Disposition in Vivo” . . . **95**

Correction to “Dimethandrolone, a Potential Male Contraceptive Pill, is Primarily Metabolized by the Highly Polymorphic UDP-Glucuronosyltransferase 2B17 Enzyme in Human Intestine and Liver” . . . . . **154**

Supplemental material is available online at <http://dmd.aspetjournals.org>.

*About the cover:* Azo reduction by gut microbiota. See the article by Braccia et al. ([dx.doi.org/10.1124/dmd.122.000898](https://doi.org/10.1124/dmd.122.000898)).
