50TH ANNIVERSARY CELEBRATION COLLECTION

Industry Perspective on the Pharmacokinetic and Absorption, Distribution, Metabolism, and Excretion Characterization of Heterobifunctional Protein Degraders
Laurie P. Volak, Heide Marika Duevel, Sara Humphreys, David Nettleton, Colin Phipps, Andy Pike, Caroline Rynn, Paul Scott-Stevens, Donglu Zhang, and Michael Zientek

ARTICLES

Systemic Exposure, Metabolism, and Elimination of [14C]-Labeled Amino Lipid, Lipid 5, after a Single Administration of mRNA-Encapsulating Lipid Nanoparticles to Sprague-Dawley Rats
Douglas Burdette, Lei Ci, Barclay Shilliday, Richard Slauter, Andrew Auerbach, Matthew Kenney, Örn Almarsson, Eugene Cheung, and Tracy Hendrick

Biodistribution of Lipid 5, mRNA, and Its Translated Protein Following Intravenous Administration of mRNA-Encapsulated Lipid Nanoparticles in Rats
Lei Ci, Marjie Hard, Hannah Zhang, Srujan Gandham, Serenus Hua, John Wickwire, Tod Wehrman, Richard Slauter, Andrew Auerbach, Matthew Kenney, Greg Mercer, Tracy Hendrick, Örn Almarsson, Eugene Cheung, and Douglas Burdette

Development and Validation of a Proteomic Correlation Profiling Technique to Detect and Identify Enzymes Involved in Metabolism of Drugs of Concern
Takashi Kudo, Shiori Hashiba, Tatsuki Fukuami, Gaku Morinaga, Kotaro Nishiyama, Hiroyuki Ichida, Keiya Hiroswa, Akiko Matsui, Naoki Ishiguro, and Miki Nakajima

6-Formylindolo[3,2-b]carbazole Protects Against Angiotensin II-Induced Cellular Hypertrophy through the Induction of Cytochrome P450 1A1 and Its Associated 19(S)-HETE Metabolite In Vitro
Ahmad H. Alammari, Samar H. Gerges, Fadumo Ahmed Isse, and Ayman O. S. El-Kadi

Characterization of Elimination Pathways and the Feasibility of Endogenous Metabolites as Biomarkers of Organic Anion Transporter 1/3 Inhibition in Cynomolgus Monkeys
Renmeng Liu, Jia Hao, Xiaofeng Zhao, and Yurong Lai

Metabolomic Profiling and Drug Interaction Characterization Reveal Riboflavin As a Breast Cancer Resistance Protein–Specific Endogenous Biomarker That Demonstrates Prediction of Transporter Activity In Vivo
Yueping Zhang, Petia A. Shipkova, Bethanne M. Warrack, David M. Nelson, Linna Wang, Runlan Hao, Jian Chen, Erika Panfen, Xue-Qing Chen, R. Marcus Fancher, Qian Ruan, Lisa J. Christopher, Yongqian Xue, Michael Sinz, and Hong Shen

Mass Balance of the Indoleamine 2,3-Dioxygenase Inhibitor Navoximod (GDC-0919) in Rats and Dogs: Unexpected Cyanide Release from Imidazo[1,5-a]pyrazin-6(5H)-one and Species Differences in Glucuronidation
Shuai Wang, Shuangshuang Ma, Eugene Chen, Jing Wang, Hou Le, Steven Paul Hanlon, Martin Binder, Wendy Lee, S. Cyrus Khojasteh, and Laurent Salpatti

Supplemental material is available at dmd.aspetjournals.org.

About the cover: “Example structures of bifunctional protein degraders with putative protein of interest (POI) ligand, linker, and E3 ligase ligand highlighted.” See the article by Volak et al. (dx.doi.org/10.1124/dmd.122.001154).
Absorption, Distribution, Metabolism, and Excretion of $[^{14}C]$iptacopan in Healthy Male Volunteers and in In Vivo and In Vitro Studies

Alexander David James, Kenneth Kulmatycki, Birk Poller, Andrea A. Romeo, Jan Jaap Van Lier, Kai Klein, and David Pearson

Variants of Flavin-Containing Monooxygenase 3 Found in Subjects in an Updated Database of Genome Resources

Miaki Makiguchi, Makiko Shimizu, Yuka Yokota, Erika Shimamura, Eiji Hishinuma, Sakae Saito, Masahiro Hiratsuka, and Hiroshi Yamazaki

The Disconnect in Intrinsic Clearance Determined in Human Hepatocytes and Liver Microsomes Results from Divergent Cytochrome P450 Activities

Tashinga E. Bapiro, Scott Martin, Stephen D. Wilkinson, Alexandra L. Orton, Niresh Hariparsad, Stephanie Harlfinger, and Dermot F. McGinnity
