

DRUG METABOLISM AND DISPOSITION

A Publication of the American Society for Pharmacology and Experimental Therapeutics

September 2023

Vol. 51, No. 9

Contents

SPECIAL SECTION ON MECHANISM-BASED PREDICTIVE METHODS IN DRUG DISCOVERY AND DEVELOPMENT

50TH ANNIVERSARY CELEBRATION COLLECTION

- | | |
|---|------|
| Special Section on Mechanism-Based Predictive Methods in Drug Discovery and Development—Editorial <i>Yurong Lai and Xiao-bo Zhong</i> | 1064 |
| A 20-Year Research Overview: Quantitative Prediction of Hepatic Clearance Using the In Vitro-In Vivo Extrapolation Approach Based on Physiologically Based Pharmacokinetic Modeling and Extended Clearance Concept <i>Yuichi Sugiyama and Yasunori Aoki</i> | 1067 |
| ☐ Preincubation Time-Dependent, Long-Lasting Inhibition of Drug Transporters and Impact on the Prediction of Drug–Drug Interactions <i>Yoshitane Nozaki and Saki Izumi</i> | 1077 |
| ☐ Evaluation of the Selectivity of Several Organic Anion Transporting Polypeptide 1B Biomarkers Using Relative Activity Factor Method <i>Grace Hoyee Chan, Robert Houle, Jinghui Zhang, Ravi Katwaru, Yang Li, and Xiaoyan Chu</i> | 1089 |
| Progress in the Quantitative Assessment of Transporter-Mediated Drug–Drug Interactions Using Endogenous Substrates in Clinical Studies <i>Tatsuki Mochizuki and Hiroyuki Kusuhara</i> | 1105 |
| ☐ Quantitative Consideration of Clinical Increases in Serum Creatinine Caused by Renal Transporter Inhibition <i>Tomohisa Nakada, Toshiyuki Kudo, and Kiyomi Ito</i> | 1114 |
| Emerging Roles of Uremic Toxins and Inflammatory Cytokines in the Alteration of Hepatic Drug Disposition in Patients with Kidney Dysfunction <i>Hiroshi Arakawa and Yukio Kato</i> | 1127 |
| Quantitative Prediction of Intestinal Absorption of Drugs from In Vitro Study: Utilization of Differentiated Intestinal Epithelial Cells Derived from Intestinal Stem Cells at Crypts <i>Kazuya Maeda</i> | 1136 |
| ☐ Predicting In Vivo Target Occupancy (TO) Profiles via Physiologically Based Pharmacokinetic–TO Modeling of Warfarin Pharmacokinetics in Blood: Importance of Low Dose Data and Prediction of Stereoselective Target Interactions <i>Woojin Lee, Min-Soo Kim, Jiyoung Kim, Yasunori Aoki, and Yuichi Sugiyama</i> | 1145 |

MINIREVIEW

- | | |
|---|------|
| In Vitro and In Vivo Models for Drug Transport Across the Blood-Testis Barrier <i>Raymond K. Hau, Stephen H. Wright, and Nathan J. Cherrington</i> | 1157 |
|---|------|

☐ Supplemental material is available at dmd.aspetjournals.org.

About the cover: “Alterations in hepatic drug disposition in patients with kidney disease.” See the article by Arakawa and Kato ([dx.doi.org/10.1124/dmd.122.000967](https://doi.org/10.1124/dmd.122.000967)).

ARTICLES

- ☐ Sex- and Lifestyle-Related Factors are Associated with Altered Hepatic CYP Protein Levels in People Diagnosed with Mental Disorders 1169
Kata W. Pedersen, Jakob Hansen, Jytte Banner, Jørgen B. Hasselstrøm, and Jakob R. Jornil
- ☐ Improvement of Protein Expression Profile in Three-Dimensional Renal Proximal Tubular Epithelial Cell Spheroids Selected Based on OAT1 Gene Expression: A Potential In Vitro Tool for Evaluating Human Renal Proximal Tubular Toxicity and Drug Disposition 1177
Naoki Ishiguro, Etsushi Takahashi, Hiroshi Arakawa, Asami Saito, Fumihiko Kitagawa, Masayuki Kondo, Gaku Morinaga, Masahito Takatani, Ryo Takahashi, Takashi Kudo, Shin-ichi Mae, Moeno Kadoguchi, Daichi Higuchi, Yuya Nakazono, Ikumi Tamai, Kenji Osafune, and Yoichi Jimbo
- ☐ In Vitro Evaluation of the Reductase Activities of Human *AKR1C3* Allelic Variants 1188
Shiori Takano, Tatsuki Fukami, Hiroyuki Ichida, Kohei Suzuki, Masataka Nakano, and Miki Nakajima
- ☐ The Influence of Lipid Microdomain Heterogeneity on Protein-Protein Interactions: Proteomic Analysis of Co-Immunoprecipitated Binding Partners of P450 1A2 and P450 3A in Rat Liver Microsomes 1196
James R. Reed, Jessie J. Guidry, Marilyn Eyer, and Wayne L. Backes
- ☐ Adipocyte-Derived PXR Signaling Is Dispensable for Diet-Induced Obesity and Metabolic Disorders in Mice 1207
Fang Wang, Jingwei Liu, Rebecca Hernandez, Se-Hyung Park, Ying-Jing Lai, Shuxia Wang, Bruce Blumberg, and Changcheng Zhou
- ☐ The Potentially Significant Role of CYP3A-Mediated Oxidative Metabolism of Dabigatran Etexilate and Its Intermediate Metabolites in Drug-Drug Interaction Assessments Using Microdose Dabigatran Etexilate 1216
Udomsak Udomnilobol, Suree Jianmongkol, and Thomayant Prueksaritanont
