SPECIAL SECTION ON MECHANISM-BASED PREDICTIVE METHODS IN DRUG DISCOVERY AND DEVELOPMENT

50TH ANNIVERSARY CELEBRATION COLLECTION

Special Section on Mechanism-Based Predictive Methods in Drug Discovery and Development—Editorial  
Yurong Lai and Xiao-bo Zhong

A 20-Year Research Overview: Quantitative Prediction of Hepatic Clearance Using the In Vitro-In Vivo Extrapolation Approach Based on Physiologically Based Pharmacokinetic Modeling and Extended Clearance Concept  
Yuichi Sugiymama and Yasunori Aoki

Preincubation Time-Dependent, Long-Lasting Inhibition of Drug Transporters and Impact on the Prediction of Drug–Drug Interactions  
Yoshitane Nozaki and Saki Izumi

Evaluation of the Selectivity of Several Organic Anion Transporting Polypeptide 1B Biomarkers Using Relative Activity Factor Method  
Grace Hoyee Chan, Robert Houle, Jinghui Zhang, Ravi Katwamu, Yang Li, and Xiaoyan Chu

Progress in the Quantitative Assessment of Transporter-Mediated Drug–Drug Interactions Using Endogenous Substrates in Clinical Studies  
Tatsuki Mochizuki and Hiroyuki Kusuhara

Quantitative Consideration of Clinical Increases in Serum Creatinine Caused by Renal Transporter Inhibition  
Tomohisa Nakada, Toshiyuki Kudo, and Kiyomi Ito

Emerging Roles of Uremic Toxins and Inflammatory Cytokines in the Alteration of Hepatic Drug Disposition in Patients with Kidney Dysfunction  
Hirosi Arakawa and Yukio Kato

Quantitative Prediction of Intestinal Absorption of Drugs from In Vitro Study: Utilization of Differentiated Intestinal Epithelial Cells Derived from Intestinal Stem Cells at Crypts  
Kazuya Maeda

Predicting In Vivo Target Occupancy (TO) Profiles via Physiologically Based Pharmacokinetic–TO Modeling of Warfarin Pharmacokinetics in Blood: Importance of Low Dose Data and Prediction of Stereoselective Target Interactions  
Wooin Lee, Min-Soo Kim, Jiyoung Kim, Yasunori Aoki, and Yuichi Sugiymama

MINIREVIEW

In Vitro and In Vivo Models for Drug Transport Across the Blood-Testis Barrier  
Raymond K. Hau, Stephen H. Wright, and Nathan J. Cherrington

Supplemental material is available at dmd.aspetjournals.org.

About the cover: “Alterations in hepatic drug disposition in patients with kidney disease.” See the article by Arakawa and Kato (dx.doi.org/10.1124/dmd.122.000967).
ARTICLES

1. Sex- and Lifestyle-Related Factors are Associated with Altered Hepatic CYP Protein Levels in People Diagnosed with Mental Disorders
   Kata W. Pedersen, Jakob Hansen, Jytte Banner, Jørgen B. Hasselstrøm, and Jakob R. Jornil

2. Improvement of Protein Expression Profile in Three-Dimensional Renal Proximal Tubular Epithelial Cell Spheroids Selected Based on OAT1 Gene Expression: A Potential In Vitro Tool for Evaluating Human Renal Proximal Tubular Toxicity and Drug Disposition
   Naoki Ishiguro, Etsushi Takahashi, Hiroshi Arakawa, Asami Saito, Fumihiko Kitagawa, Masayuki Kondo, Gaku Morinaga, Masahito Takatani, Ryo Takahashi, Takashi Kudo, Shin-ichi Mae, Moeno Kadoguchi, Daichi Higuchi, Yuya Nakazono, Ikumi Tamai, Kenji Osafune, and Yoichi Jimbo

3. In Vitro Evaluation of the Reductase Activities of Human AKR1C3 Allelic Variants
   Shiori Takano, Tatsuki Fukami, Hiroyuki Ichida, Kohei Suzuki, Masataka Nakano, and Miki Nakajima

4. The Influence of Lipid Microdomain Heterogeneity on Protein-Protein Interactions: Proteomic Analysis of Co-Immunoprecipitated Binding Partners of P450 1A2 and P450 3A in Rat Liver Microsomes
   James R. Reed, Jessie J. Guidry, Marilyn Eyer, and Wayne L. Backes

5. Adipocyte-Derived PXR Signaling Is Dispensable for Diet-Induced Obesity and Metabolic Disorders in Mice
   Fang Wang, Jingwei Liu, Rebecca Hernandez, Se-Hyung Park, Ying-Jing Lai, Shuxia Wang, Bruce Blumberg, and Changcheng Zhou

   Udomsak Udomnilobol, Suree Jiammongkol, and Thomayant Pruksaritanont
