## Supplemental figure 1

**Supplemental figure 1. Microscopic images of neuron glia mixed cultures at Day 1 and 7.** Mesencephalic primary neuron-glia cells prepared from E14 mouse embryos were cultured for 7 days and observed in bright-field. **B.** Expression of ER $\alpha$ . Protein extracts prepared from neuron glia mixture cells at Days 1, 3, 5 and 7 were subjected to Western blot analysis using an anti-ER $\alpha$  antibody as shown in Fig. 2A
